

Great Lakes GV5510 Control Reference Card

Initial Start-up

When your spa is first activated, it will go into Priming Mode, indicated by "Pr". The Priming Mode will last for less than 3 minutes (less "Warm" or "Cool" to skip Priming Mode) and then the spa will begin to heat and maintain the water temperature in the Standard Mode.

Temperature

The start-up temperature is set at 100°F/37°C. The adjustable temperature range is 80°F/26.7°C-90°C. The last measured temperature is constantly displayed on the LCD.

Note that the last measured spa temperature displayed is current only when the pump has been running for at least 2 minutes.

To display the set temperature, press the "Warm" or "Cool" button once.

To change the set temperature, press the button a second time before the LCD stops flashing. Each press of the "Warm" or "Cool" button will continue to either raise or lower the set temperature.

After three seconds, the LCD will stop flashing and will display the current spa temperature.

Turbo

This button is used to turn the blower on and off. If left on, the blower automatically turns off after 15 minutes.

Jets 1

Press the "Jets 1" button once to activate the low speed of the pump and again for the high speed. Press the "Jets 1" button again to turn off the pump. If left running, the low speed of the pump will automatically turn off after 4 hours, and the high speed will automatically turn off after 15 minutes. The low speed of the pump runs when the blower or pump 2 is on. It may also activate for at least 2 minutes every 30 minutes to detect the spa temperature and then to heat to the set temperature if needed, depending upon mode. When the low speed turns on automatically, it cannot be deactivated from the panel; however, the high speed may be started.

Jets 2

Press the "Jets 2" button once to turn pump 2 on or off. If left running, pump 2 will automatically turn off after 15 minutes.

Light

Press the "Light" button to turn the light on and off. If left on, the light automatically turns off after 4 hours.

Mode

The default mode is set to Standard. Mode is changed by pressing the "Mode" button before the LCD stops flashing.

Standard Mode is programmed to maintain the desired temperature. Note that the last measured spa temperature displayed is current only when the pump has been running for at least 2 minutes. "Std" will be displayed momentarily when you switch into Standard Mode.

Economy Mode heats the spa to the set temperature only during filter cycles. "Eco" will display solid when temperature is not current, and will alternate with temperature when temperature is current.

Sleep Mode heats the spa to within 20°F/10°C of the set temperature only during filter cycles. "SLP" will display solid when temperature is not current, and will alternate with temperature when temperature is current.

Pre-set Filter Cycles

The first filter cycle begins 6 minutes after the spa is energized. The second filter cycle begins 12 hours later. Filter duration is programmable for 2, 4, 6, 8 hours or for continuous filtration (indicated by "Fl LC"). The default filter time is 2 hours.

To program, press "Warm" or "Cool" then "Jets 1" before the LCD stops flashing. Press "Warm" or "Cool" to adjust. Press "Jets 1" to exit programming.

The blower purges for 30 seconds and pump 2 purges for 3 minutes at the beginning of each filter cycle. The low speed of the pump runs during filtration and the ozone generator (if installed) will be enabled.

Freeze Protection

If the temperature sensors detect a drop to below 44°F/6.7°C within the heater, the pump and blower will automatically activate to provide freeze protection. The equipment stops on until 4 minutes after the sensors detect that the spa temperature has risen to 45°F/7.2°C or higher. In colder climates, an optional additional freeze sensor may be added to protect against freeze conditions that may not be sensed by the standard sensors. Auxiliary freeze sensor protection acts similarly except with the temperature thresholds determined by the switch and without a 4-minute delay in turnoff. See your dealer for details.
