Reinventing Local and Regional Economies Gerald L. Gordon, 2011-09-28 Recent US economic history is rife with examples of cities and regions that have experienced significant decline Many of those localities began to slide after decades even generations of feeling immune to economic disaster Boeing and Kodak the steel industry in Pittsburg and the automotive industry in Detroit all expected to make it golden into the distant future Tapping into the available body of knowledge as well as through nearly 70 interviews the experiences of those who lived and worked in those times in cities around the United States to identify the most effective strategies Reinventing Local and Regional Economies delineates the dos and don ts to observe in order to sustain economic vitality in any community Written by Dr Gerald Gordon president and

chief executive officer of the Economic Development Authority in Fairfax County Virginia the book explores lessons learned and examines the messages communities must be mindful of in order to ensure future economic stability Drawing on more than 30 years of experience Gordon identifies a set of foundational lessons that while they are not guarantees of success certainly portend failure if ignored by local planners Each chapter explores a different prerequisite and then applies it to several case studies of the reinvention of local and regional economies Each of these basic components of economic growth will then be examined against the backgrounds of the many communities studied thus permitting comparisons and contrasts to be drawn A comparative analysis of results from one community to another across a wide range of case studies this book puts into clear context the observations about what works not only in one locale but in communities with common features facing common issues and getting similar results Using case studies and real world examples of successes and failures Dr Gordon provides the tools to develop a proactive strategy that positions your community for surviving and thriving regardless of external stresses and adverse economic conditions that may be out of your control
