

# Safe Manual Handling

## Overview

Over a risk of accidents arises from manual handling activities and, if these, staff should be told:

### THE MANUAL HANDLING OPERATIONS REGULATION 1992

These regulations are intended to reduce the risk of injury to employees when carrying out manual handling, which is defined as physical activity that involves lifting, lowering, pushing and pulling.

### Typical manual handling injuries include:

- Damage to ligaments and tendons
- Sprains or strains
- Bruised skin
- Fractures

### The human body:

The back is composed of a series of short, cylindrical bones separated by cushioning discs. Tendons and muscles support the spine, and your requirement is a warning that this system is at risk of injury.

## Risk Assessment

This is the process of identifying significant risks and assessing how they arise. It then allows a range of control measures to be devised and applied, which will manage risk down to an acceptable level. Such an assessment must be carried out by a competent individual familiar with the legal requirements and the tasks undertaken. Where there are 5 or more employees, assessments must be written down.

### The assessment should consider risks to the '5D' format:

#### Task

- Can the mechanical aid be employed?
- Can reorganising or redesigning equipment be achieved?
- Can redesign the system to help where loads must be lifted/tied?
- Will there be positive problems with or the need for load to be away from the body?

#### Individual

- Does the worker have any health issues?
- Are pregnant workers involved in lifting?
- Does the individual require constant monitoring?

#### Load

- Are it heavy, awkward or handle of force used?
- What is the weight?
- What load is needed?

#### Environment

- Are there issues with temperature - too high or low?
- Are there irregularities in the floor?
- Are there enough lights?
- Are there other people's problems - such as high winds?

## Employer & Employee Duties

### Employers:

- Must assess the level of risk faced by their employees
- Must implement a safe system of work based on the assessment
- Must assess manual handling where reasonably practicable an alternative can be employed
- Must reduce any residual risk as far as is practicable
- Must provide relevant information and training
- Must assess assessments and work systems

### Employees:

- Must adhere to the safe system of work
- Must use the equipment and systems provided
- Must undertake training offered by the employer
- Must report any problems to they with the company premises

### Prevention of injury:

- In order to safeguard yourself you should:
- Lift the weight within your ability and in line with the guidelines given in training
- Maintain good posture at all times
- Always be warm-up before strenuous work
- If you feel pain, rest until completely well and seek medical aid
- Report any incident which gives rise to pain

## Good Handling Technique

### Planning

- Can I handle the load?
- Are any lifting aids available?
- Do I need help?
- What obstacles are in my way?
- Do I have any personal problems my employer must be aware of?

### Position

- Keep feet apart with one foot leading the other
- Keep the spine straight and shoulders level
- Bend from the knees - do not lean over the load

### Grip

- Ensure a secure grip on the object being moved
- Use your fingers
- Use any footholds provided

### The lift

- Keep the chest forward
- Use your 'trunk' - lift progressively
- Use the legs to lift, not the back
- Keep the load tight against the body with any hands and arms
- Do not lift the load out by reaching
- If necessary, use the feet down to adjust your grip

District Nursing Manual of Clinical Procedures Liz O'Brien,2012-03-09 This manual the first of its kind focused on district nursing provides the means to build competence and confidence in nurses new to the community or developing their skills The comprehensive and evidence based content provides essential information for competence in key areas of district nursing From the Foreword by Rosemary Cook CBE Hon D Lett MSc PG Dip RGN Director The Queen s Nursing Institute

Clinical skills are a fundamental aspect of district nursing care. The District Nursing Manual of Clinical Procedures is a practical evidence based manual of clinical skills which reflects the unique challenges of district nursing care within the patient's home. It provides a comprehensive resource for all district nurses, community nurses, students and healthcare professionals involved in the district nursing team, enabling them to practice competently and confidently and deliver clinically effective person centred care. The District Nursing Manual of Clinical Procedures addresses the complexity of district nursing care and encompasses key aspects of clinical practice including decision making in areas that district and community nurses often struggle with or find difficult when they are on their own in a patient's home. It utilises the latest clinical research and expert clinical knowledge to address these challenges and to provide the underlying theory and evidence for district nursing care.

**Key features:**

- Evidence based manual of practical clinical skills in district nursing care
- Clear, user friendly and easy to understand
- Contains recommendations for expert care within a patient's own home
- Addresses key concerns of district and community nurses working on their own within a patient's home
- Encompasses key aspects of district nursing care
- Placed in the context of person centred care
- All procedures include the rationale for each action, why as well as how
