Trinitis,J. Weidendorfer,2017-01-05 High performance computing HPC has become an essential tool in the modern world However systems frequently run well below theoretical peak performance with only 5% being reached in many cases In addition costly

components often remain idle when not required for specific programs as parts of the HPC systems are reserved and used exclusively for applications. A project was started in 2013 funded by the German Ministry of Education and Research BMBF to find ways of improving system utilization by compromising on dedicated reservations for HPC codes and applying co scheduling of applications instead. The need was recognized for international discussion to find the best solutions to this HPC utilization issue and a workshop on co scheduling in HPC open to international participants. The COSH workshop was held for the first time at the European HiPEAC conference in Prague, Czech Republic in January 2016. This book presents extended versions of papers submitted to the workshop reviewed for the second time to ensure scientific quality. It also includes an introduction to the main challenges of co scheduling and a foreword by Arndt Bode, head of LRZ, one of Europe's leading computer centers, as well as a chapter corresponding to the invited keynote speech by Intel whose recent extensions to their processors allow for better control of co scheduling.

Federal Trade Commission Privacy Law and Policy Chris Jay Hoofnagle, 2016-02-09 The Federal Trade Commission, a US agency created in 1914 to police the problem of bigness, has evolved into the most important regulator of information privacy and thus innovation policy in the world. Its policies profoundly affect business practices and serve to regulate most of the consumer economy. In short, it now regulates our technological future. Despite its stature, however, the agency is often poorly understood by observers and even those who practice before it. This volume, by Chris Jay Hoofnagle, an internationally recognized scholar with more than fifteen years of experience interacting with the FTC, is designed to redress this confusion by explaining how the FTC arrived at its current position of power. It will be essential reading for lawyers, legal academics, political scientists, historians, and anyone else interested in understanding the FTC's privacy activities and how they fit in the context of the agency's broader consumer protection mission.

Designing, Deploying, and Evaluating Virtual and Augmented Reality in Education Akcayir, Gokce, Demmans Epp, Carrie, 2020-10-23 Augmented reality (AR) and virtual reality (VR) provide flexibility in education and have become widely used for the promotion of multimedia learning. This use coincides with mobile devices becoming prevalent, VR devices becoming more affordable, and the creation of user-friendly software that allows the development of AR/VR applications by non-experts. However, because the integration of AR and VR into education is a fairly new practice that is only in its initial stage, these processes and outcomes need to be improved. *Designing, Deploying, and Evaluating Virtual and Augmented Reality in Education* is an essential research book that presents current practices and procedures from different technology implementation stages: design, deployment, and evaluation, to help educators use AR/VR applications in their own teaching.

practices The book provides comprehensive information on AR and VR applications in different educational settings from various perspectives including but not limited to mobile learning formal informal learning and integration strategies with practical and or theoretical implications Barriers and challenges to their implementation that are currently faced by educators are also addressed This book is ideal for academicians instructors curriculum designers policymakers instructional designers researchers education professionals practitioners and students
