## Html5 Enterprise Application Development:

**Html5 Enterprise Application Development** Nehal Shah, Gabriel Jose Balda Ortiz, 2014-10-23 For developers who want to build enterprise web applications using HTML5 CSS3 JavaScript and external APIs this tutorial is all you need Structured around the creation of a real application it s practical and easily assimilated Overview Learn the most useful HTML5 features by developing a real world application Detailed solutions to most common problems presented in an enterprise application development Discover the most up to date development tips tendencies and trending libraries and tools In Detail HTML5 has been a trending topic for a long time but the lack of Flash support on iOS devices has sped up its penetration New features in HTML5 come at a time when web developers are pushing the limits of what is achievable and HTML5 CSS3 and JavaScript have become an important alternative for building rich user interfaces HTML5 Enterprise Application Development will guide you through the process of building an enterprise application with HTML5 CSS3 and JavaScript through creating a movie finder application You will learn how to apply HTML5 capabilities in real development problems and how to support consistent user experiences across multiple browsers and operating systems including mobile platforms This book will teach you how to build an enterprise application from scratch using HTML5 CSS3 JavaScript and external APIs You will discover how to develop engaging experiences using HTML5 capabilities including video and audio management location services and 3D and 2D animations We will also cover debugging techniques automated testing and performance evaluations to give you all the tools needed for an efficient development workflow HTML5 Enterprise Application Development is a comprehensive guide for anyone who wants to build an enterprise web application You will learn through the implementation of a real world application as we show you handy libraries development tips and development tools What you will learn from this book Write easy to read HTML using semantic tags and use canvas to draw 2D and 3D elements in your browser in real time Learn how to create consistent experiences through multiple browsers and devices Manage video and audio in modern browsers with no extra plugins needed Add AJAX calls to your applications for loading data with no browser refresh and parallelize your JavaScript calls using web workers Implement drag and drop using HTML5 capabilities and style your enterprise application using new CSS3 properties Discover the use of APIs though Twitter s API examples Learn how to automate your test using web applications testing systems and evaluate your application performance using profiling tools Approach A practical development tutorial giving users step by step instructions to allow them to create an enterprise web application Who this book is written for This book is for developers who want to create enterprise web applications with engaging user experiences with no browser plugins Basic JavaScript programming and knowledge of HTML and CSS is required No knowledge of HTML5 or CSS3 is assumed *Java EE and HTML5 Enterprise Application Development* John Brock, Arun Gupta, Geertjan Wielenga, 2014-03-28 Create Next Generation Enterprise Applications Build and distribute business web applications that target both desktop and mobile devices Cowritten by Java

EE and NetBeans IDE experts Java EE and HTML5 Enterprise Application Development fully explains cutting edge highly responsive design tools and strategies Find out how to navigate NetBeans IDE construct HTML5 programs employ JavaScript APIs integrate CSS and WebSockets and handle security This Oracle Press guide also offers practical coverage of SaaS MVVM and RESTful concepts Explore HTML5 and Java EE 7 features Use NetBeans IDE editors templates and code generators Implement MVVM functionality with Knockout.js Dynamically map database objects using Java Persistence API Configure manage and invoke RESTful Web Services Maximize messaging efficiency through WebSockets Accept and process HTML5 Server Sent Events streams Employ Syntactically Awesome Stylesheets CSS3 and Sassy CSS *HTML5 Enterprise Application Development* Nehal Shah, Gabriel José Balda Ortíz, Gabriel Balda, 2013 A practical development tutorial giving users step by step instructions to allow them to create an enterprise web application This book is for developers who want to create enterprise web applications with engaging user experiences with no browser plugins Basic JavaScript programming and knowledge of HTML and CSS is required No knowledge of HTML5 or CSS3 is assumed

**Html5 Web Application Development by Example Beginner's Guide** J. M. Gustafson, 2013-01-01 The best way to learn anything is by doing The author uses a friendly tone and fun examples to ensure that you learn the basics of application development Once you have read this book you should have the necessary skills to build your own applications If you have no experience but want to learn how to create applications in HTML5 this book is the only help you'll need Using practical examples HTML5 Web Application Development by Example will develop your knowledge and confidence in application development **Sams Teach Yourself HTML5 Mobile Application Development in 24 Hours** Jennifer

Kyrnin, 2011-11-15 In just 24 sessions of one hour or less learn how to build rich robust mobile apps that run on smartphones tablets and other devices and interact with users in powerful new ways Using this book's straightforward step by step approach you'll master leading edge practical skills you can use whether you're developing for the iPad iPhone or Android Discover how to quickly build new mobile apps and upgrade older apps provide cutting edge media content leverage advanced features ranging from geolocation to the semantic web and even simplify complex back end development Each lesson builds on what you've already learned giving you a rock solid foundation for real world success Step by step instructions carefully walk you through the most common HTML5 mobile development tasks Quizzes and Exercises at the end of each chapter help you test your knowledge By the Way notes present interesting information related to the discussion Did you Know tips offer advice or show you easier ways to perform tasks Watch Out cautions alert you to possible problems and give you advice on how to avoid them Learn how to Work with the new HTML5 tags most valuable for mobile development Get started fast with HTML5 features already supported by today's browsers Detect mobile devices and HTML5 support and upgrade sites to support them Style and build more efficient usable mobile pages Use jQuery Mobile to quickly create mobile apps Leverage HTML5's breakthrough drawing and typography features Efficiently integrate media content

into your apps Add meaning with HTML5 sectioning and semantic elements Implement drag and drop more easily than ever Build offline applications and other apps that use local storage Detect and work with location data via the GeoLocation API Use microformats and microdata to make web pages friendlier to computers Add powerful back end functionality with WebSockets Web Workers and File APIs Improve user navigation with the History API      **Practical Enterprise**

**Application Development** Francesco Marchioni, 2022-12-19 Jakarta EE 10 is the latest version of the Java Enterprise Edition EE platform which is designed to help developers build modern scalable and secure enterprise applications This book provides a comprehensive guide to using Jakarta EE 10 covering everything from its architecture and key technologies to best practices and advanced topics With this book you will learn how to set up your development environment create and deploy Jakarta EE applications and use the latest features in the platform and improved cloud native capabilities Whether you are new to Jakarta EE or an experienced Java EE developer this book will provide you with the knowledge and skills you need to build robust and efficient enterprise applications with Jakarta EE 10 The first part of the book covers everything from the foundation components EJB Servlets CDI JPA to the new technology stack defined in Jakarta EE 10 including Batch API JSON P API the Concurrency API Web Sockets the JMS API the core Web services stack Jakarta REST Services Jakarta SOAP Services The testing area with Arquillian framework and the Security API is also fully covered in this part At the end of this part you will be able to create and deploy Enterprise applications on the top of Jakarta EE 10 runtimes WildFly 27 or newer and migrate your existing Java EE applications The second part of the book discusses how to integrate the Jakarta Enterprise API with the Microprofile specification to provide essential services to develop robust microservices such as the Configuration API the Health API the Fault tolerance API the OpenAPI and Tracing API the Metrics API JWT Authentication API and REST Client API Finally the third part of the book covers how to build Microservices using WildFly Bootable jar technology and how to deploy them on the cloud with Red Hat OpenShift What you will learn from this book Everything you need to know about Java EE Jakarta EE 10 and MicroProfile API How to set up your development environment to build Enterprise applications and Microservices on the top of WildFly Learn the best Maven plugins that you can use to simplify your project scaffolding Learning the foundation components that constitute the backbone of your applications EJB CDI JPA JAX RS JAX WS How to build loosely coupled applications using the straightforward JMS API How to test your applications with Arquillian in a managed environment remote environment and even on the cloud Discover how to develop Concurrent and Compliant Enterprise applications using the Concurrency API and how to define Batch Jobs using WildFly's batch subsystem Secure all kinds of applications Web EJB with standard and custom login modules How to encrypt the communication of EJB applications and Web applications How to enhance your Jakarta EE stack with Microprofile API to build robust Microservices How to turn your Jakarta EE applications in Microservices using WildFly Bootable jar technology

Heffelfinger,2024-02-29 Learn Jakarta EE by building real world microservices with code examples practical

exercises and the latest Jakarta EE features

**Key Features** Craft microservices using standard Jakarta EE technologies such as Jakarta RESTful Web Services JSON Processing and JSON Binding Design web based applications with Jakarta Faces

Harness Jakarta EE technologies such as Jakarta Enterprise Beans and Jakarta Messaging to build enterprise applications

Purchase of the print or Kindle book includes a free PDF eBook

**Book Description** Jakarta EE stands as a robust standard with multiple implementations presenting developers with a versatile toolkit for building enterprise applications However despite the advantages of enterprise application development vendor lock in remains a concern for many developers limiting flexibility and interoperability across diverse environments This Jakarta EE application development guide addresses the challenge of vendor lock in by offering comprehensive coverage of the major Jakarta EE APIs and goes beyond the basics to help you develop applications deployable on any Jakarta EE compliant runtime This book introduces you to JSON Processing and JSON Binding and shows you how the Model API and the Streaming API are used to process JSON data You ll then explore additional Jakarta EE APIs such as WebSocket and Messaging for loosely coupled asynchronous communication and discover ways to secure applications with the Jakarta EE Security API Finally you ll learn about Jakarta RESTful web service development and techniques to develop cloud ready microservices in Jakarta EE By the end of this book you ll have developed the skills to craft secure scalable and cloud native microservices that solve modern enterprise challenges

**What you will learn** Design microservices architectures with a clear separation of concerns Understand the contexts and dependency injection CDI specification to develop Java EE applications Use Jakarta Faces to create interactive web applications using component based development Understand the steps involved in handling JSON data with Jakarta JSON Processing and Binding Design secure RESTful web services using server sent events SSE for real time data updates Secure your applications with the Jakarta Security API Build message driven applications with Jakarta Messaging

**Who this book is for** This book is for Java developers looking to learn Jakarta EE and expand their skill set You ll also find this book useful if you are familiar with Java EE and want to stay abreast of the latest version of the Jakarta EE specification

**Knowledge of core Java concepts** such as OOP data types control flow and basic collections will be beneficial
