Simplified Signs: A Manual Sign-Communication System for Special Populations, Volume 2. John D. Bonvillian, Nicole Kissane Lee, Tracy T. Dooley, Filip T. Loncke, 2020-07-30 Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages. It is the culmination of over twenty years of research and development by the authors. The Simplified Sign System has been developed and tested for ease of sign comprehension, memorization, and formation by limiting the complexity of the motor skills required to form each sign and by ensuring that each sign visually resembles the meaning it conveys. Volume 1 outlines the research underpinning and informing the project and places the Simplified Sign System in a wider context of sign usage historically and by different populations. Volume 2 presents the lexicon of signs totalling approximately 1000 signs each with a clear illustration and a written description of how the sign is formed as well as a memory aid that connects the sign visually to the meaning that it conveys. While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities, cerebral palsy, autism, or aphasia, it may also assist the communication needs of a wider audience such as healthcare professionals, aid workers, military personnel, travellers, or parents and children who have not yet mastered spoken language. The system also has been shown to enhance learning for individuals studying a foreign language. Lucid and comprehensive, this work constitutes a valuable resource that will enhance the communicative interactions of many different people and will be of great interest to researchers and educators alike.

The Family Caregiver's Manual David Levy, 2016-04-04 A complete step by step guide offering problem solving and coping skills applicable to every caregiver's unique circumstances. Drawing from over twenty five years of experience, Levy provides caregivers with a model for effective planning and problem solving focusing on the nonclinical aspects of caregiving which are often neglected by medical professionals. Caring for young and old victims of disability, illness, and chronic disorders. Finding ways to make our healthcare system work. Assembling core information about a loved one's life. Developing a realistic view of how much care a loved one needs today and may need tomorrow and understanding that continuum of care. Locating resources that can make a difference in making sure a loved one's care needs are met. Finding a good family caregiver support group. Overcoming the roadblocks the caregiver's feelings of distress and failure can create. Taking a practical approach to that overused phrase "Take care of yourself." David Levy, JD is a gerontologist and a recognized family caregiver expert. Levy holds a Doctor of Jurisprudence and is a Florida Supreme Court Certified Family Mediator in family caregiving and a certified Family Conflict Dynamics Profiler. He facilitates weekly family caregiver support groups and counsels family caregivers both pro bono and privately.
