In the more than thirty years since the publication of Daniel H Janzen s classic Costa Rican Natural History research in this small but astonishingly biodiverse well preserved and well studied Latin American nation has evolved from a species level approach to the study of entire ecosystems And from the lowland dry forests of Guanacaste to the montane cloud forests of Monteverde from the seasonal forests of the Central Valley to the coastal species assemblages of Tortuguero Costa Rica has proven to be as richly diverse in ecosystems as it is in species In Costa Rican Ecosystems Maarten Kappelle brings together a collection of the world s foremost experts on Costa Rican ecology outstanding scientists such as Daniel H Janzen Jorge Cort s Jorge A Jim nez Sally P Horn Robert O Lawton Qu rico Jim nez M Carlos Manuel Rodr guez Catherine M Pringle and Eduardo Carrillo J among others to offer the first comprehensive account of the diversity structure function uses and conservation of Costa Rica s ecosystems Featuring a foreword and introductory remarks by two renowned leaders in biodiversity science and ecological conservation Thomas E Lovejoy and Rodrigo G mez Lobo in addition to chapters highlighting the geology soils and climate of Costa Rica as well as the ecosystems of its terrestrial freshwater and marine habitats and including previously unpublished information on Isla del Coco this beautiful color illustrated book will be an essential reference for academic scientists students natural history guides conservationists educators park guards and visitors alike **Fiscal Monitor,**

October 2018 International Monetary Fund. Fiscal Affairs Dept.,2018-10-10 Public sector balance sheets provide the most comprehensive picture of public wealth They bring together all the accumulated assets and liabilities that the government controls including public corporations natural resources and pension liabilities They thus account for the entirety of what the state owns and owes offering a broader fiscal picture beyond debt and deficits Most governments do not provide such transparency thereby avoiding the additional scrutiny it brings Better balance sheet management enables countries to

increase revenues reduce risks and improve fiscal policymaking There is some empirical evidence that financial markets are increasingly paying attention to the entire government balance sheet and that strong balance sheets enhance economic resilience This issue of the Fiscal Monitor presents a new database that shows comprehensive estimates of public sector assets and liabilities for a broad sample of 31 countries covering 61 percent of the global economy and provides tools to analyze and manage public wealth Estimates of public wealth reveal the full scale of public assets and liabilities Assets are worth US 101 trillion or 219 percent of GDP in the sample This includes 120 percent of GDP in public corporation assets Also included are natural resources that average 110 percent of GDP among the large natural resource producing countries Recognizing these assets does not negate the vulnerabilities associated with the standard measure of general government public debt comprising 94 percent of GDP for these countries This is only half of total public sector liabilities of 198 percent of GDP which also includes 46 percent of GDP in already accrued pension liabilities Once governments understand the size and nature of public assets they can start managing them more effectively Potential gains from better asset management are considerable Revenue gains from nonfinancial public corporations and government financial assets alone could be as high as 3 percent of GDP a year equivalent to annual corporate tax collections across advanced economies In addition considerable gains could be realized from government nonfinancial assets Public assets are a significant resource and how governments use and report on them matters not just for financial reasons but also in terms of improving service delivery and preventing the misuse of resources that often results from a lack of transparency
