Matlab 2015a Manual Gui:

Introduction to Credit Risk Giulio Carlone, 2020-11-09 Introduction to Credit Risk focuses on analysis of credit risk derivatives equity investments portfolio management quantitative methods and risk management In terms of application this book can be used as an important tool to explain how to generate data rows of expected exposure to counterparty credit risk The book also directs the reader on how to visualize in real time the results of this data generated with a Java tool Features Uses an in depth case study to illustrate multiple factors in counterparty credit risk exposures Suitable for quantitative risk managers at banks as well as students of finance financial mathematics and software engineering Provides the reader with numerous examples and applications Giulio Carlone has an MBA a PhD and a Master s degree in Computer Science from the University of Italy He is a member of the software system engineering staff of the Department of Computer Science at University College London He has 20 years of practical experience in technical software engineering and quantitative finance engineering in the commercial sector His research interests include the use of communication strategies and the implementation of plans and projects using financial software for requirement specifications requirements analysis and architectural design

Practical Guide for Biomedical Signals Analysis Using Machine Learning Techniques

Abdulhamit Subasi, 2019-03-16 Practical Guide for Biomedical Signals Analysis Using Machine Learning Techniques A MATLAB Based Approach presents how machine learning and biomedical signal processing methods can be used in biomedical signal analysis Different machine learning applications in biomedical signal analysis including those for electrocardiogram electroencephalogram and electromyogram are described in a practical and comprehensive way helping readers with limited knowledge Sections cover biomedical signals and machine learning techniques biomedical signals such as electroencephalogram EEG electromyogram EMG and electrocardiogram ECG different signal processing techniques signal de noising feature extraction and dimension reduction techniques such as PCA ICA KPCA MSPCA entropy measures and other statistical measures and more This book is a valuable source for bioinformaticians medical doctors and other members of the biomedical field who need a cogent resource on the most recent and promising machine learning techniques for biomedical signals analysis Provides comprehensive knowledge in the application of machine learning tools in biomedical signal analysis for medical diagnostics brain computer interface and man machine interaction Explains how to apply machine learning techniques to EEG ECG and EMG signals Gives basic knowledge on predictive modeling in biomedical time series and advanced knowledge in machine learning for biomedical time series

Applied Machine Learning for Smart Data Analysis Nilanjan Dey, Sanjeev Wagh, Parikshit N. Mahalle, Mohd. Shafi Pathan, 2019-05-20 The book focuses on how machine learning and the Internet of Things IoT has empowered the advancement of information driven arrangements including key concepts and advancements Ontologies that are used in heterogeneous IoT environments have been discussed including interpretation context awareness analyzing various data sources machine learning algorithms and intelligent services and

applications Further it includes unsupervised and semi supervised machine learning techniques with study of semantic analysis and thorough analysis of reviews Divided into sections such as machine learning security IoT and data mining the concepts are explained with practical implementation including results Key Features Follows an algorithmic approach for data analysis in machine learning Introduces machine learning methods in applications Address the emerging issues in computing such as deep learning machine learning Internet of Things and data analytics Focuses on machine learning techniques namely unsupervised and semi supervised for unseen and seen data sets Case studies are covered relating to human health transportation and Internet applications Applications of Mathematics in Science and Technology Bui Thanh Hung,M. Sekar,Ayhan ESI,R. Senthil Kumar,2025-04-29 The Conference dealt with one of the most important problems faced in International development in Pure Mathematics and Applied mathematics development in engineering such as Cryptography Cyber Security Network Operations Research Heat Equation and so forth The aim of the conference was to provide a platform for researchers engineers academicians as well as industrial professionals to present their research results and development activities in Pure and Apply Mathematics and its applied technology It provided opportunities for the delegates to exchange new ideas and application experiences to establish business or research relations and to find global partners for future collaboration **Modular Multilevel Converter Modelling and Simulation for HVDC Systems** Davide del Giudice,Federico Bizzarri,Daniele Linaro,Angelo Maurizio Brambilla,2022-10-21 This book provides a comprehensive review of the models and approaches that can be employed to simulate modular multilevel converters MMCs Each solution is described in terms of operating principle fields of applicability advantages and limitations In addition this work proposes a novel and efficient simulation approach for MMCs based on sub circuit isomorphism This technique which has its roots in the electronics fields can be profitably exploited to simulate MMCs regardless of the model used to describe its sub modules including the most accurate ones Lastly this book considers a well known high voltage direct current HVDC benchmark system consisting of two MMCs After describing the implementation details of each benchmark component simulation results in several scenarios ranging from normal operating conditions to faults in the AC and DC grid are included to validate the proposed approach and showcase its key features Due to its educational content this book constitutes a useful guide for PhD students and researchers interested in the topic of MMCs and their simulation It also serves as a starting platform for junior electrical engineers who work in the field of power electronic converters for HVDC systems Power System Dynamics and Stability Peter W. Sauer,M. A. Pai,Joe H. Chow,2017-07-14 Classic power system dynamics text now with phasor measurement and simulation toolbox This new edition addresses the needs of dynamic modeling and simulation relevant to power system planning design and operation including a systematic derivation of synchronous machine dynamic models together with speed and voltage control subsystems Reduced order modeling based on integral manifolds is used as a firm basis for understanding the derivations and limitations of lower order dynamic models Following these developments

multi machine model interconnected through the transmission network is formulated and simulated using numerical simulation methods Energy function methods are discussed for direct evaluation of stability Small signal analysis is used for determining the electromechanical modes and mode shapes and for power system stabilizer design Time synchronized high sampling rate phasor measurement units PMUs to monitor power system disturbances have been implemented throughout North America and many other countries In this second edition new chapters on synchrophasor measurement and using the Power System Toolbox for dynamic simulation have been added These new materials will reinforce power system dynamic aspects treated more analytically in the earlier chapters Key features Systematic derivation of synchronous machine dynamic models and simplification Energy function methods with an emphasis on the potential energy boundary surface and the controlling unstable equilibrium point approaches Phasor computation and synchrophasor data applications Book companion website for instructors featuring solutions and PowerPoint files Website for students featuring MATLABTM files Power System Dynamics and Stability 2nd Edition with Synchrophasor Measurement and Power System Toolbox combines theoretical as well as practical information for use as a text for formal instruction or for reference by working engineers

Water and Energy International ,2017 **Brick and Block Masonry** Claudio Modena,F. da Porto,M.R.

Valluzzi,2016-11-03 Brick and Block Masonry Trends Innovations and Challenges contains the lectures and regular papers presented at the 16th International Brick and Block Masonry Conference Padova Italy 26 30 June 2016 The contributions cover major topics Analysis of masonry structures Bond of composites to masonry Building physics and durability Case studies Codes and standards Conservation of historic buildings Earthen constructions Eco materials and sustainability Fire resistance blasts and impacts Masonry bridges arches and vaults Masonry infill walls and RC frames Masonry materials and testing Masonry repair and strengthening New construction techniques and technologies Reinforced and confined masonry Seismic performance and vulnerability assessment In an ever changing world in which innovations are rapidly implemented but soon surpassed the challenge for masonry the oldest and most traditional building material is that it can address the increasingly pressing requirements of quality of living safety and sustainability This abstracts volume and full paper USB device focusing on challenges innovations trends and ideas related to masonry in both research and building practice will prove to be a valuable source of information for researchers and practitioners masonry industries and building management authorities construction professionals and educators **Proceedings of the 8th International Ergonomics Conference**

Davor Sumpor,Kristian Jambrošić,Tanja Jurčević Lulić,Diana Milčić,Ivana Salopek Čubrić,Irena Šabarić,2021-03-29 This book presents the proceedings of the 8th International Ergonomics Conference ERGONOMICS held in Zagreb Croatia on December 2 5 2020 By highlighting the latest theories and models as well as cutting edge technologies and applications and by combining findings from a range of disciplines including engineering design robotics healthcare management computer science human biology and behavioral science it provides researchers and practitioners alike with a comprehensive timely

guide on human factors and ergonomics It also offers an excellent source of innovative ideas to stimulate future discussions and developments aimed at applying knowledge and techniques to optimize system performance while at the same time promoting the health safety and wellbeing of individuals The proceedings include papers from researchers and practitioners scientists and physicians institutional leaders managers and policy makers that contribute to constructing the Human Factors and Ergonomics approach across a variety of methodologies domains and productive sectors *Big Data for Remote Sensing: Visualization, Analysis and Interpretation* Nilanjan Dey,Chintan Bhatt,Amira S. Ashour,2018-05-23 This book thoroughly covers the remote sensing visualization and analysis techniques based on computational imaging and vision in Earth science Remote sensing is considered a significant information source for monitoring and mapping natural and man made land through the development of sensor resolutions that committed different Earth observation platforms The book includes related topics for the different systems models and approaches used in the visualization of remote sensing images It offers flexible and sophisticated solutions for removing uncertainty from the satellite data It introduces real time big data analytics to derive intelligence systems in enterprise earth science applications Furthermore the book integrates statistical concepts with computer based geographic information systems GIS It focuses on image processing techniques for observing data together with uncertainty information raised by spectral spatial and positional accuracy of GPS data The book addresses several advanced improvement models to guide the engineers in developing different remote sensing visualization and analysis schemes Highlights on the advanced improvement models of the supervised unsupervised classification algorithms support vector machines artificial neural networks fuzzy logic decision making algorithms and Time Series Model and Forecasting are addressed This book guides engineers designers and researchers to exploit the intrinsic design remote sensing systems The book gathers remarkable material from an international experts panel to guide the readers during the development of earth big data analytics and their challenges
