American health is at a crossroads with millions of people needing healthcare yet the system cannot keep up with the demand. We need healthcare but somehow it all seems complicated and not simple to attain. Nurse practitioners and physician assistants working collaboratively shoulder to shoulder with physicians and other healthcare professionals can help resolve this mounting crisis. The book ends with a passionate plea to increase the use of the primary care workforce to prevent chronic care diseases and promote healthy living. Americans deserve the very best that healthcare has to offer. **Midwives in Mexico** Hanna Laako, Georgina Sánchez-Ramírez, 2021-02-25

This book presents the contemporary history and dynamics of Mexican midwifery: professional, post-modern or autonomous, traditional and Indigenous as profoundly political and embedded in differing societal stratifications. By 'situated politics' the authors refer to various networks, spaces and territories which are also constructed by the midwives. By 'politically situated' the authors refer to various intersections, unsettled relations and contexts in which Mexican midwives are positioned. Examining Mexican midwiferies in depth, the volume sharpens the focus on the worlds in which midwives are profoundly immersed as agents in generating and participating in movements, alliances, health professions, communities, homes, territories and knowledges. The chapters provide a complex panorama of midwives in Mexico with an array of insights into their professional and political autonomy, post-coloniality, body territoriality, the challenges of defining midwifery and, above all, into the ways in which contemporary Mexican midwiferies relate to a complex set of human rights. The book will be of interest to a range of scholars from anthropology, sociology, politics, global health, gender studies, development studies and Latin American studies as well as to midwives and other professionals involved in childbirth policy and practice.
