End Of Life Care In Neurological Disease:

Palliative Care in Neurological Disease Judi Byrne, 2009 The particular needs of people with progressive long term neurological conditions including Parkinson s Disease Motor Neurone Disease MND Multiple Sclerosis MS and Huntington s disease may make care delivery and planning the last stages of life ethically practically and clinically challenging However only in recent years has serious attention been paid to palliative care approaches for people affected by conditions other than cancer This unique and comprehensive book builds bridges between palliative and neurological care expertise recognising that such people may require intensive input from rehabilitation and therapy teams at the same time as complex symptom management and supportive non clinical care Its comprehensive guidance on managing these complex conditions aims to enable those living with them to enjoy the best quality of life for as long as possible *End of Life Care in Neurological Disease*

David Oliver, 2012-11-27 As end of life care is extended to more and more people it is increasingly important that people with progressive neurological disease are recognised as having particular issues as their disease progresses This group of people with advancing motor neurone disease multiple sclerosis Parkinson s disease multiple systems atrophy progressive supranuclear palsy Huntington s disease and other progressive neurological disease face increasing problems with physical symptoms and psychosocial and spiritual issues for both themselves and their families and carers This book encourages health and social care professionals to become closely involved in the care of these people and their families so that advance care plans can be started and quality of life maintained This book addresses the principles and practice of developing end of life care strategies for neurological disease written with a clinical multidisciplinary focus and illustrated with detailed case studies **Palliative Care in Neurology** Raymond Voltz, Marianne de Visser, David Oliver, 2020-03-10

Over the last 50 years palliative care has usually been associated with cancer patients but more recently there has been increased discussion of the role of palliative care for neurological patients In the past years neurology has moved from being a purely diagnostic area to a very therapeutically active one A further step needs to be taken to modify the therapeutic activity from cure to care depending on the patient s disease trajectory Palliative care has been associated with care at the end of life whereas it may be appropriate earlier in the disease progression and will extend after death in the support of bereaved families The care of patients with neurological disease and their families will encompass the psychological spiritual and existential issues and neurologists and the teams in which they work should develop skills to consider all aspects of care in order to maximize the quality of life of all involved and enable patients to die peacefully *Palliative Care in Neurological Disease*

Judi Byrne, Penny McNamara, Jane Seymour, Pam McClinton, 2021-12-16 The particular needs of people with progressive long term neurological conditions including Parkinson s Disease Motor Neurone Disease MND Multiple Sclerosis MS and Huntington s disease may make care delivery and planning the last stages of life ethically practically and clinically challenging *Palliative Care in Neurological Disease* Judi Byrne, 2009 The particular needs of people with progressive long

Palliative Neurology Ian Maddocks,Bruce Brew,Heather Waddy,Ian Williams,2005-11-17 Palliative care affirms the value of holistic support for persons facing death from advanced disease Increasingly the approach of palliative care is seen as relevant not only to terminal cancer its initial concern but also to many other incurable conditions To date the major emphasis of specialist neurology has been on diagnosis and the continuing long term management of the many major diseases has received far less attention This handbook aims to provide succinct and practical advice on the management of

major neurological disorders in both their supportive and terminal phases recognizing that these conditions are increasing in prevalence in virtually every society as the proportion of elderly persons grows It demonstrates how the discomforts encountered in dementia stroke Parkinson s disease ALS Huntington s disease muscular dystrophies and multiple sclerosis can benefit from the same comprehensive approach to palliation as has evolved in specialist care for cancer **Advocacy in Neurology** Wolfgang Grisold,Walter Struhal,Thomas Grisold,2019-02-21 Advocacy is a broad term that covers activities aimed at increasing attention awareness information nursing treatment and support to improve the outcome of patients These actions can be focused directly towards patients or indirectly via third parties Although advocacy is present in all medical specialties neurology in particular finds itself in need of strong advocacy tools as the diagnosis treatment long term care and associated resource and social issues have become increasingly complex While some physicians implicitly or explicitly act as advocates there is a lack of holistic research in order to clarify the meaning of advocacy along with concrete methods and strategies Advocacy in Neurology provides an integrated approach to the concept of advocacy in neurology Structured in five sections the book begins by explaining the term advocacy in general before elaborating on the areas of interest within neurology The text goes on to offer concrete strategies and tools for clinicians to deploy advocacy in their daily work and then discusses specific neurological diseases to point out and explain where advocacy is or could be beneficial The book ends with an outlook presentation of results and an ending conclusion Advocacy in Neurology offers a practical perspective on advocacy activities in neurology aiming to show when and why they are important for neurology **Palliative Care in Amyotrophic Lateral Sclerosis** David Oliver,Gian Domenico Borasio,Wendy Johnston,2014 This volume provides an evidence based guide to the care of people with ALS MND including the control of symptoms the psychosocial care of patients and their families and care in bereavement **Neurodegenerative Disorders** Orla Hardiman,Colin P.
