

Energy Forces & Charges Simulation

<https://phet.colorado.edu/en/simulation/energy-forces-and-charges>

Before simulation, give students advance "view" several different forms of energy, and the changes (transformations) from various different forms. Also give students an opportunity to think about what form of energy (potential/kinetic) changes when the potential of a system (like energy) is transformed into kinetic energy (movement) and vice versa.

Example: When energy flows from a source, the kinetic energy (movement) of the particles (like a gas) changes the potential energy (like a spring).
