John Livesley, Roseann Larstone, 2018-03-08 This authoritative work comprehensively reviews what is known about personality disorders including vital information to guide clinical decision making Leading experts synthesize contemporary thinking about the classification etiologies and development of these complex disorders Diagnostic issues are explored and available assessment instruments are discussed The Handbook provides in depth coverage of all commonly used psychotherapeutic and pharmacological treatments with particular attention to the empirical evidence for each approach Also addressed are special treatment modalities such as day programs and group therapy and forensic issues

Psychological Assessment and Testing John Spores, 2022-06-08 Expanding upon and updating the first edition this comprehensive guide instructs readers on how to effectively conduct psychological assessment and testing in their practice efficiently advancing a case from the initial referral and clinical interview through the testing process and leading to informed diagnosis and treatment recommendations This second edition incorporates updated editions of all major tests pertinent revisions from the DSM 5 more in depth analysis of testing topics and coverage of new constructs that are the targets of psychological testing relevant to outpatient mental health practice Readers will learn about the fundamentals of assessment testing and psychological measurement the complete process of psychological testing using a broad range of major tests supplemented by interpretive flowcharts and case examples Downloadable practice and report forms along with data tables with pre drafted interpretive excerpts for all tests are also available for immediate use in clinical practice Psychologists in both practice and training will come away with the tools and knowledge needed to successfully conduct psychological assessment and testing within the contemporary mental health field

Positive Psychological Assessments: Modern Approaches, Methodologies, Models and Guidelines Llewellyn Ellardus Van Zyl, Peter ten Klooster, Leon T. de Beer, Mariëlle Zondervan-Zwijnenburg, Maria Vera, Arianna Costantini, 2022-11-08

Handbook on Moving Corrections and Sentencing Forward Pamela K. Lattimore, Beth M. Huebner, Faye S. Taxman, 2020-11-10 This volume addresses major issues and research in corrections and sentencing with the goal of using previous research and findings as a platform for recommendations about future research evaluation and policy The last several decades witnessed major policy changes in sentencing and corrections in the United States as well as considerable research to identify the most effective strategies for addressing criminal behavior These efforts included changes in sentencing that eliminated parole and imposed draconian sentences for violent and drug crimes The federal government followed by most states implemented sentencing guidelines that greatly reduced the discretion of the courts to impose sentences The results were a multifold increase in the numbers of individuals in jails and prisons and on community supervision increases that have only recently crested There were also efforts to engage prosecutors and the courts in diversion and oversight including the development of prosecutorial diversion programs as well as a variety of specialty courts

Penal reform has included efforts to understand the transitions from prison to the community including federal led efforts focused on reentry programming Community corrections reforms have ranged from increased surveillance through drug testing electronic monitoring and in some cases judicial oversight to rehabilitative efforts driven by risk and needs assessment More recently the focus has included pretrial reform to reduce the number of people held in jail pending trial efforts that have brought attention to the use of bail and its disproportionate impact on people of color and the poor This collection of chapters from leading researchers addresses a wide array of the latest research in the field A unique approach featuring responses to the original essays by active researchers spurs discussion and provides a foundation for developing directions for future research and policymaking

Research: Developments in Theory, Application and Related Approaches Paul M. W. Hackett, Yael Fisher, 2019-11-01

In this Research Topic the two editors bring together a series of articles that use facet theory and allied approaches to research Since its inception in the work of Louis Guttman in the mid twentieth century facet theory has become an established approach within social science research In addition over the past 70 years a wide range of research publications have appeared operating within the theoretical and analytic rubric of facet theory and for the last two decades a biennial international conference has been held devoted to facet theory research When using a facet theory approach an implicit aim of the research within this framework is to bring together in an explicit manner a clear definition of the content area that is being investigated along with data analysis procedures Integrating the explicit design of research content for example attitudes values etc and its subsequent analysis for example to identify the variables that are influential to respondents in relation to the specific area under investigation allows for the construction of theory relating to the content area and for the meaningful measurement of complex research areas The clear explication of an area of research content is achieved through the use of a mapping sentence MS In a MS all of the pertinent variables called facets associated with the specific subject matter of the research study are specified in the form of a natural language sentence where facets variables are arranged to demonstrate how these theoretically relate to each other Sub levels of facets are defined in such a way as to capture the relationships of research variables facets to each other and the overall research domain Background variables are also stated in the MS along with a specified range over which observations will be made to test the veracity of the structural hypotheses statements regarding the proposed manner in which variables are related to the study's content implicit in the MS Furthermore by using a MS the researcher is able to select variables that appropriately address the area of content Traditionally facet theory has been used in quantitative research but has recently been applied to the analysis of qualitative and philosophical research which incorporates a declarative mapping sentence in such research and which is included in this Research Topic In order to interrogate these structural hypotheses quantitative data analysis procedures are employed such as Smallest Space Analysis SSA and Partial Order Scalogram Analysis by base Coordinates POSAC In SSA the structure of the content area of interest the variables that have been included in the MS can be interrogated as observations that have been made along the specified outcome range are represented geometrically as partitioned regions in a concept space

related to the specific research domain Individual respondents may also be investigated in terms of their profile of facet related scores using POSAC A similar approach is employed when analysing information from qualitative facet theory research which interrogates the structural hypotheses present in the declarative mapping sentence through approaches such as content and narrative analyses This Research Topic presents work from scholars with particular emphasis upon how the approach has developed both theoretically and in terms of its application new areas of application and advances in theory development SRGP operating instructions and program documentation Cambridge Systematics,1979
