

2.1.1 Levels of Ecology

Ecology encompasses all the living and nonliving things around us. The study of ecology focuses on the interactions between and among these living things, their environment and the environment in affecting them. The problems of environmentalists disappear from their minds once they know levels of ecology. "Should they keep polluting when 'environmental' teachers' demand?" How scientists collect the most accurate data where their highest priority lies?"

When ecologists examine the interactions between organisms and their surroundings, they consider organisms at various levels of organization. From the molecules, they can predict the behavior of the organism based on what the molecule is. Molecular biology leads to health care and the understanding of ecology, living things, and the world in which they live.

Ecological Levels of Organization
