Solving the Internet Jurisdiction Puzzle Dan Jerker B. Svantesson,2017-10-06 Internet jurisdiction has emerged as one of the greatest and most urgent challenges online affecting areas as diverse as e commerce data privacy law enforcement content take downs cloud computing e health cyber security intellectual property freedom of speech and cyberwar In this innovative book Professor Svantesson presents a vision for a new approach to Internet jurisdiction based on an extensive period of research dedicated to the topic The book demonstrates that our current paradigm remains attached to territorial thinking that is out of sync with our modern world especially but not only online Having made the claim that our adherence to the territoriality principle is based more on habit rather than on any clear and universally accepted legal principles Professor Svantesson advances a new jurisprudential framework for how we approach jurisdiction a framework that unites private and public international law He also proposes several other reform initiatives aimed at equipping us to solve the Internet jurisdiction puzzle In addition the book provides a history of Internet jurisdiction and challenges our traditional categorisation of different types of jurisdiction It places Internet jurisdiction in a broader context and outlines methods for how to properly understand and work with rules of Internet jurisdiction While *Solving the Internet Jurisdiction Puzzle* paints a clear picture of the concerns involved and the problems that needs to be overcome this book is distinctly aimed at finding practical solutions anchored in a solid theoretical framework Professor Svantesson argues that many of the Internet jurisdiction problems we face are due to a sleepwalking like acceptance of orthodox thinking *Solving the Internet Jurisdiction Puzzle* acts as a wake up call to this issue *Soldiers on the Home Front* William C. Japan's Effectiveness as a Geo-Economic Actor
Yuka Koshino, Robert Ward, 2022-03-27 Geo economic strategy deploying economic instruments to secure foreign policy aims and to project power has long been a key element of statecraft In recent years it has acquired even greater salience given China's growing antagonism with the United States and the willingness of both Beijing and Washington to wield economic power in their confrontation This trend has particular significance for Japan given its often tense political relationship with China which remains its largest trading partner While Japan's post war geo economic performance often failed to match its status as one of the world's largest economies more recently Tokyo has demonstrated increased geo economic agency and effectiveness In this Adelphi book Yuka Koshino and Robert Ward draw on multiple disciplines including economics political economy foreign policy and security policy and interviews with key policymakers to examine Japan's geo economic power in the context of great power competition between the US and China They examine Japan's previous underperformance how Tokyo's understanding of geo economics has evolved and given constraints on its national power projection what actions Japan might feasibly take to become a more effective geo economic actor Their conclusions will be of direct interest not only for all those concerned with Japanese grand strategy and the Asia Pacific but also for those middle powers seeking to navigate great power competition in the coming decades
