Laboratory Epistemologies Jenny Boulboulé,2024-10-11 In *Laboratory Epistemologies A Hands On Perspective* Jenny Boulboulé examines the significance of hands on experiences in contemporary life sciences laboratories Addressing the relationship between contemplation and manipulation in epistemology Boulboulé combines participant observations in molecular genetics labs and microbiological cleanrooms with a longue dur e study of the history and philosophy of science She radically rereads Descartes s key epistemological text *Meditations on First Philosophy* reframing the philosopher as a hands on knowledge maker With this reading Boulboulé subverts the pervasive modern conception of the disembodied knower and puts the hands on experimenter at the heart of life sciences research In so doing she contributes a theoretical model for understanding how life processes on cellular and molecular levels are manually produced in today s techno scientific spaces By reassessing the Cartesian legacy and arguing that epistemology should be grounded in the standpoint of a hands on practitioner Boulboulé offers the philosophical and historical foundation to understand and study contemporary life sciences research as multisensory embodied practices *Proceedings of the Parliament of South Australia* South Australia.
