Eco-architecture III Santiago Hernández, 2010-03-16 This book contains most of the papers presented in the Eco Architecture 2010 conference which was the third edition of the International Conference on Harmonisation between Architecture and Nature Previous editions that were very successful were held previously in the New Forest UK in 2006 and the Algarve Portugal in 2008 and demonstrated the importance of a forum like this to discuss the characteristics and challenges of such architectural vision Eco Architecture implies a new approach to the design process intended to harmonise its products with nature This involves ideas such as minimum use of energy at each stage of the building process taking into account the amount required during the extraction and transportation of materials their fabrication assembly building erection maintenance and eventual future recycling Presentations in the conference were related to topics like building technologies design by passive systems design with nature ecological and cultural sensitivity life cycle assessment quantifying sustainability in architecture resources and rehabilitation and issues from education research and practice Case studies from different places around the world were also presented **Flow** Penny Sparke, Patricia Brown, Patricia Lara-Betancourt, Gini Lee, Mark Taylor, 2018-07-12 Flow combines cutting edge scholarship with practitioner perspectives to address the concept of flow and how it connects interiors landscapes and buildings expanding on traditional notions of architectural prominence Contributors explore the transitional and intermediary relationships between inside outside Through a range of case studies authors extend the notion of flow beyond the western industrialised world and embrace a wider geography while engaging with the specificity of climate and place Accompanied by stunning colour illustration and

photography Flow brings together historical theoretical and practice based approaches to consider themes of nature mobility continuity and frames

Representing Landscapes Nadia Amoroso, Martin Holland, 2022-03-23 This volume provides an in depth historical overview of graphic and visual communication styles techniques and outputs from key landscape architects over the past century Representing Landscapes One Hundred Years of Visual Communication offers a detailed account of how past and present landscape architects and practitioners have harnessed the power of visualization to frame and situate their designs within the larger cultural social ecological and political milieux The fifth book in the Representing Landscapes series the presentations contained within each of the 25 chapters of this work are not merely drawings and illustrations but are rather graphic touchstones whose past and current influence shapes how landscape architects think and operate within the profession This collected volume of essays gathers notable landscape historians scholars and designers to offer their insights on how the landscape has been presented and charts the development and use of new technologies and contemporary theory to reveal the conceptual power of the living medium of the larger landscape Richly detailed with over 220 colour and black and white illustrations from some of the discipline s best known landscape architects and designers this work is a must have for those studying contemporary landscape design or those fascinated by the profession s history

Landscape Architecture Criticism Jacky Bowring, 2020-04-29 Landscape Architecture Criticism offers techniques perspectives and theories which relate to landscape architecture a field very different from the more well known domains of art and architectural criticism Throughout the book Bowring delves into questions such as how do we know if built or unbuilt works of landscape architecture are successful What strategies are used to measure the success or failure and by whom Does design criticism only come in written form It brings together diverse perspectives on criticism in landscape architecture establishing a substantial point of reference for approaching design critique exploring how criticism developed within the discipline Beginning with an introductory overview to set the framework the book then moves on to historical perspectives the purpose of critique theoretical positions ranging from aesthetics to politics and experience unbuilt projects techniques and communication Written for professionals and academics as well as for students and instructors in landscape architecture it includes strategies diagrams matrices and full colour illustrations to prompt discussion and provide a basis for exploring design critique

Site Matters Carol Burns, Andrea Kahn, 2005 This volume through theoretical essays and empirically grounded pieces on Le Corbusier s designs contemporary suburbs and the planning agendas of the World Trade Center site provides theory on the appreciation of site and context in architecture

Inside/Outside Islamic Art and Architecture Saygin Salgirli, 2021-07-29 When we walk into a gallery we have a fairly good idea where the building begins and ends and inside while observing a painting we are equally confident in distinguishing between the painting proper and its frame and borders Yet things are often more complicated A building defines an exterior space just as much as an interior and what we perceive to be ornamental and marginal to a given painting may in fact be central to what it represents In this volume a simple

question is presented instead of dichotomous separations between inside and outside or exterior and interior what other relationships can we think of The first book of its kind to grapple with this question **Inside Outside Islamic Art and Architecture** focuses on a wide spectrum of mediums and topics including painted manuscripts objects architectural decoration architecture and urban planning and photography Bringing together scholars with diverse methodologies who work on a geographical span stretching from India to Spain and Nigeria and across a temporal spectrum from the thirteenth to the twenty first century this original book also poses engaging questions about the boundaries of the field **Large Parks** John Beardsley,2007-07-26 Publisher description **American Playgrounds** Susan G. Solomon,2005 A compelling history a manifesto and a manual for change **New York Behind Closed Doors** Polly Devlin,2017-09-05 A look inside the homes of New York City s artists designers writers and social influencers including in depth interviews These twenty four homes reflect the tastes and styles of real New Yorkers who live in small spaces with art books collections treasures and fabulous sometimes funky furniture each space expressing the resident s unique personality Bright captivating photographs throughout pair dynamically with Polly Devlin s in depth interviews with the homeowners Her critiques of their spaces are at once delightful bold and irreverent and always lively and opinionated From architectural grandeur to streamlined modern buildings see how individuals turn older apartments and historic structures into places for comfortable living Houses and apartments are sampled from across the city including Tribeca Murray Hill Union Square Harlem Midtown Brooklyn and more Assembled by a former Vogue editor and a photographer who has worked for House Beautiful Travel Leisure and other major publications this is a visual and literary feast Showcases some of New York City s most unique residential dwellings Elle Decor **Women, Modernity, and Landscape Architecture** Sonja Dümpelmann,John Beardsley,2015-02-11 Modernity was critically important to the formation and evolution of landscape architecture yet its histories in the discipline are still being written This book looks closely at the work and influences of some of the least studied figures of the era established and less well known female landscape architects who pursued modernist ideals in their designs The women discussed in this volume belong to the pioneering first two generations of professional landscape architects and were outstanding in the field They not only developed notable practices but some also became leaders in landscape architectural education as the first professors in the discipline or prolific lecturers and authors As early professionals who navigated the world of a male dominated intellectual and menial work force they were exponents of modernity In addition many personalities discussed in this volume were either figures of transition between tradition and modernism like Silvia Crowe Maria Teresa Parpagliolo or they fully embraced and furthered the modernist agenda like Rosa Kliass Cornelia Oberlander The chapters offer new perspectives and contribute to the development of a more balanced and integrated landscape architectural historiography of the twentieth century Contributions come from practitioners and academics who discuss women based in USA Canada Brazil New Zealand South Africa the former USSR Sweden Britain Germany Austria France and

Italy Ideal reading for those studying landscape history women s studies and cultural geography *Living with the Sea* Mike Brown, Kimberley Peters, 2018-10-03 The seas and oceans are currently taking centre stage in academic study and public consciousness From the plastics littering our seas to the role of climate change on ocean currents from unequal access of marine resources to the treacherous experiences of seafarers who keep our global economy afloat now is a crucial time to examine how we live with the sea This ambitious book brings together an interdisciplinary and international cohort of contributors from within and beyond academia It offers a range and diversity of insights unlike previous collections An oceanic turn is taking place with a burgeoning of academic work that takes seriously the place of seas and oceans in understanding socio cultural and political life past and present Yet there is a significant gap concerning the ways in which we engage with seas and oceans with a will to enliven action and evoke change This book explores these challenges offering insights from spatial planning architectural design geography educational studies anthropology and cultural studies An examination through these lenses can help us to better understand human relationships with the seas and oceans and promote an ethic of care for the future Resilience in Ecology and Urban Design S.T.A. Pickett, M.L. Cadenasso, Brian McGrath, 2013-01-13 The contributors to this volume propose strategies of urgent and vital importance that aim to make today s urban environments more resilient Resilience the ability of complex systems to adapt to changing conditions is a key frontier in ecological research and is especially relevant in creative urban design as urban areas exemplify complex systems With something approaching half of the world s population now residing in coastal urban zones many of which are vulnerable both to floods originating inland and rising sea levels making urban areas more robust in the face of environmental threats must be a policy ambition of the highest priority The complexity of urban areas results from their spatial heterogeneity their intertwined material and energy fluxes and the integration of social and natural processes All of these features can be altered by intentional planning and design The complex integrated suite of urban structures and processes together affect the adaptive resilience of urban systems but also presupposes that planners can intervene in positive ways As examples accumulate of linkage between sustainability and building landscape design such as the Shanghai Chemical Industrial Park and Toronto s Lower Don River area this book unites the ideas data and insights of ecologists and related scientists with those of urban designers It aims to integrate a formerly atomized dialog to help both disciplines promote urban resilience *Integral Urbanism* Nan Ellin, 2013-10-18 Integral Urbanism is an ambitious and forward looking theory of urbanism that offers a new model of urban life Nan Ellin s model stands as an antidote to the pervasive problems engendered by modern and postmodern urban planning and architecture sprawl anomie a pervasive culture and architecture of fear in cities and a disregard for environmental issues Instead of the reactive and escapist tendencies characterizing so much contemporary urban development Ellin champions an integral approach that reverses the fragmentation of our landscapes and lives through proactive design solutions Women Reclaiming the City Tigran Haas, 2023-04-04 The originality of Women

Reclaiming the City lies not only in the variety of themes being presented but also in the variety of all these different highly respected women researchers This book is the first in which current societal themes revolving around urbanism architecture and city planning are put forth solely through female perspectives It reveals the importance of having female lenses on certain societal debates Twenty five leading female urban scholars draw on principles concepts and positions that are foundational to other frameworks and fields specifically critical studies indigenous and ethnic studies postcolonial theory queer theory feminist theory progressive urban theory social ecology urban planning and design architecture urban economics and urban social geography landscape urbanism new urbanism heritage management and urbanism political ecology and cultural studies to present alternatives to the current classical theories and conceptualizations that have failed to engage a truly intersectional analysis of dominant city and urban discourses policies and practices The book is intended for scholars of urban studies policy makers and city planning professionals

Anatomy of Design Steven Heller, Mirko Ilic, 2009-03-01 *DI* Anatomy of Design dissects fifty examples of graphic design piece by piece revealing an array of influences and inspirations These pieces represent contemporary artifacts that are well conceived finely crafted and filled with hidden treasures Some are overtly complex Others are so simple that it is hard to believe there s a storehouse of inspiration hidden underneath The selections include all kinds of design work including posters packages and more Each exhibit is selected for its ubiquity thematic import and aesthetic significance and every page shows how great work is derived from various inspirational and physical sources some well known some unknown div

Multimodality in the Built Environment Louise J. Ravelli, Robert J. McMurtrie, 2015-11-19 This book provides an extended exploration of the multimodal analysis of spatial three dimensional texts of the built environment culminating in a holistic approach termed Spatial Discourse Analysis SpDA Based on existing frameworks of multimodal analysis this book applies adapts and extends these frameworks to spatial texts The authors argue that choices in spatial design create meanings about what we perceive and how we can or should behave within spatial texts influence how we feel in and about those spaces and enable these texts to function as coherent wholes Importantly a spatial text once built is also a resource which is then used and an essential aspect of understanding these texts is to consider what users themselves contribute to the meaning potential of these texts The book takes the metafunctional approach familiar from Systemic Functional Linguistics SFL and foregrounds each metafunction in turn textual interpersonal experiential and logical in relation to the detailed analysis of a particular spatial text

Great City Parks Alan Tate, 2015-03-05 Great City Parks is a celebration of some of the finest achievements of landscape architecture in the public realm It is a comparative study of thirty significant public parks in major cities across Western Europe and North America Collectively they give a clear picture of why parks have been created how they have been designed how they are managed and what plans are being made for them at the beginning of the twenty first century Based on unique research including extensive site visits and interviews with the managing organisations this book is illustrated throughout with clear

plans and photographs with this new edition featuring full colour throughout Tate updates his seminal 2001 work with 10 additional parks including The High Line in NYC Golden Gate Park in San Francisco and Westergasfabriek Amsterdam All the previous city parks have also been updated and revised to reflect current usage and management This book reflects a belief that well planned well designed and well managed parks and park systems will continue to make major contributions to the quality of life in an increasingly urbanized world

Architectural Research Addressing Societal Challenges Manuel Jorge Rodrigues Couceiro da Costa,Filipa Roseta,Joana Pestana Lages,Susana Couceiro da Costa,2019-08-08 The escalating interdependency of nations drives global geopolitics to shift ever more quickly Societies seem unable to control any change that affects their cities whether positively or negatively Challenges are global but solutions need to be implemented locally How can architectural research contribute to the future of our changing society How has it contributed in the past The theme of the 10th EAAE ARCC International Conference Architectural Research Addressing Societal Challenges was set to address these questions This book Architectural Research Addressing Societal Challenges includes reviewed papers presented in June 2016 at the 10th EAAE ARCC International Conference which was held at the facilities of the Faculty of Architecture of the University of Lisbon The papers have been further divided into the following five sub themes a Changing Society In Transit Global Migration Renaturalization of the City Emerging Fields of Architectural Practice and Research on Architectural Education The EAAE ARCC International Conference held under the aegis of the EAAE and of the ARCC is a conference organized every other year in collaboration with one of the member schools universities of those associations alternatively in North America or in Europe
