and artists while making a national effort to document the country's shared history and culture. The American Guide series consists of individual guides to each of the states. Little known authors many of whom would later become celebrated literary figures were commissioned to write these important books. John Steinbeck, Saul Bellow, Zora Neale Hurston, and Ralph Ellison are among the more than 6,000 writers, editors, historians, and researchers who documented this celebration of local histories. Photographs, drawings, driving tours, detailed descriptions of towns, and rich cultural details exhibit each state's unique flavor. For a reader interested in small town life in the early 20th century, the WPA Guide to Ohio is an excellent resource. A series of photographs by Ben Shahn for the Farm Security Administration is well complemented with 17 selective essays about the political, industrial, and cultural life in the Buckeye State. The essay on the economy provides interesting information on the labor movement in Ohio.

A Field Guide to Lies Daniel J. Levitin, 2019-11-19 Winner of the National Business Book Award. From the New York Times bestselling author of *The Organized Mind* and *This Is Your Brain on Music*, a primer to the critical thinking that is more necessary now than ever. We are bombarded with more information each day than our brains can process, especially in election season. It's raining bad data, half truths, and even outright lies. New York Times bestselling author Daniel J. Levitin shows how to recognize misleading announcements, statistics, graphs, and written reports, revealing the ways lying weasels can use them. It's becoming harder to separate the wheat from the digital chaff. How do we distinguish misinformation, pseudo facts, and distortions from reliable information? Levitin groups his field guide into two categories: statistical information and faulty arguments, ultimately showing how science is the bedrock of critical thinking. Infodis literacy means understanding that there are hierarchies of source quality and bias that variously distort our information feeds via every media channel, including social media. We may expect newspapers, bloggers, the government, and Wikipedia to be factually and logically correct, but they so often aren't. We need to think critically about the words and numbers we encounter if we want to be successful at work, at play, and in making the most of our lives. This means checking the plausibility and reasoning, not passively accepting information, repeating it, and making decisions based on it. Readers learn to avoid the extremes of passive gullibility and cynical rejection. Levitin's charming, entertaining, accessible guide can help anyone wake up to a whole lot of things that aren't so. And catch some weasels in their tracks.
