

For cold-wire applications: TTW 4000 KD welding torch with integrated remote-control, display and wirefeed unit
TR 2200 F remote-control pedal unit: For precision control of the welding amperage at all times

A complete system, from the robot interface all the way through to the TIG welding torch

Fronius is a system supplier. Each member of the system is designed to "fit in" optimally with all the others, in perfect harmony. It takes in everything from modularly designed power sources (available for both gas and water-cooled torches, incidentally), to remote-control units, cooling units, trolleys and a wide range of different robot interfaces, as well as complete welding-data documentation and visualisation.

Quality at the push of a button

Even welding systems with very wide-ranging functionality ought to be easy to operate. And it is just this which is yet another big strength of the Fronius systems. The extensive know-how stored in the systems can be intuitively retrieved, and the control panels are self-explanatory and straightforward. What is more, there is a choice of two different control panels for this series of machines: Standard or Job. The "Job" control panel offers additional functions such as job mode, and enables cold-wire control and automated applications.

SAFETY

Green lights all round

As anybody at all familiar with Fronius machines will know, their safety features are second to none. Every power source comes with the CE mark and with the S mark - permitting welding in confined spaces in conditions of enhanced electrical hazard, also when AC welding, of course. What is more, each of the power sources amply fulfils the requirements of IEC "degree of protection IP 23", meaning that it is safely protected from dirt and water, for use in the field. The integral fan is thermostat-controlled and so only runs when it is needed. This reduces dirt collection and prolongs the service life of the power source. At Fronius, though, safety starts even sooner, in the development stage. The MagicWave and TransTig machines were designed from the ground up to be so robust and compact that they can take just about anything in their stride.

TransTig control panel

MagicWave "Job" control panel

Fronius Magic Wave Operating Manual

Tobias Bleicker

Fronius Magic Wave Operating Manual:

Unveiling the Power of Verbal Art: An Mental Sojourn through **Fronius Magic Wave Operating Manual**

In some sort of inundated with monitors and the cacophony of immediate interaction, the profound energy and psychological resonance of verbal beauty often disappear into obscurity, eclipsed by the constant assault of noise and distractions. However, located within the lyrical pages of **Fronius Magic Wave Operating Manual**, a captivating work of literary brilliance that pulses with fresh emotions, lies an memorable journey waiting to be embarked upon. Written by a virtuoso wordsmith, this exciting opus instructions visitors on an emotional odyssey, softly exposing the latent possible and profound influence stuck within the complex web of language. Within the heart-wrenching expanse with this evocative evaluation, we can embark upon an introspective exploration of the book is central subjects, dissect its charming publishing design, and immerse ourselves in the indelible impact it leaves upon the depths of readers souls.
