

1. Introduction

The purpose of this study is to investigate the effects of the proposed system on the performance of the participants.

The study was conducted in a laboratory setting with a sample of 30 participants.

The results of the study are presented in the following sections.

The data collected during the experiment were analyzed using statistical methods.

The findings of the study suggest that the proposed system has a positive impact on performance.

Further research is needed to confirm these results and explore the underlying mechanisms.

The study was supported by the National Science Foundation and the Department of Education.

The authors would like to thank the participants and the research assistants for their contributions.

The data and code used in this study are available upon request.

The study was approved by the Institutional Review Board at the University of California, Los Angeles.

The authors have no conflicts of interest to declare.

The study was conducted in accordance with the ethical standards of the Institutional Review Board.
