LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

MODULE 1: Introduction

At the beginning of the virtual lab, you were asked to select eight lizards from a category. What criteria did you use to select your group?

My criteria were: size, color, and shape of the lizards.

Did your teacher grade individual team efforts?

Yes, my teacher graded individual team efforts. She asked us to write a paragraph about the lizards we selected and to explain why we selected them.

An adaptation is a structure or function that the organism has as a response to its environment. The ability to survive and reproduce is a particular adaptation. Provide one example and an explanation of an adaptation of the lizard group.

One example of an adaptation is the lizard's ability to change color. This is an adaptation because it helps the lizard survive and reproduce by blending in with its environment.

Provide one evolutionary explanation for why lizards that are good at surviving and reproducing (i.e., that group) would have survived a bottleneck.

One evolutionary explanation is that the lizards that were good at surviving and reproducing had a higher fitness than the lizards that were not good at surviving and reproducing.
