Virtual Reality in

Manual Order Picking Jan-Karl Knigge, 2021-08-30 The introduction of consumer level head mounted devices HMDs has led to a major drop in the application costs of virtual reality VR making the technology available for a wide range of users To understand if VR HMDs can be used for planning and training in the context of manual order picking this thesis provides the results of a large scale randomized controlled study in which order picking has been compared between a virtual and a real

environment The results imply that VR HMDs can indeed be used by manufacturers and warehouse operators in a rack planning process if the reduction of searching times or the perceived workload is in focus Additionally the findings enable the use of VR HMDs for scientific research on human centred rack design Finally the thesis highlights the usability of VR HMDs for training manual order picking activities

DHM2020 L. Hanson,D. Högberg,E. Brolin,2020-09-11 Digital human modeling DHM is an active field of research directed towards the goal of creating detailed digital models of the human body and its functions as well as assessment methods for evaluating human interaction with products and production systems These have many applications in ergonomics design and engineering in fields as diverse as the automotive industry and medicine This book presents the proceedings of the 6th International Digital Human Modeling Symposium DHM2020 held in Skövde Sweden from 31 August to 2 September 2020 The conference was also accessible online for those unable to attend in person because of restrictions due to the Covid 19 pandemic The symposium provides an international forum for researchers developers and users to report their latest innovations summarize new developments and experiences within the field and exchange ideas results and visions in all areas of DHM research and applications The book contains the 43 papers accepted for presentation at the conference and is divided into 6 sections which broadly reflect the topics covered anthropometry behavior and biomechanical modeling human motion data collection and modeling human product interaction modeling industry and user perspectives and production planning and ergonomics evaluation Providing a state of the art overview of research and developments in digital human modeling the book will be of interest to all those who are active in the field
