public relations and advertising campaigns becomes imperative to the success of the business. However, with the introduction of new media, the nature of these campaigns has changed. Today's consumers have more awareness and diversified ways to obtain knowledge, and through new media they can provide feedback. An understanding of how to utilize new media to promote and sustain the reputation of an organization is vital for its continued success. The Handbook of Research on New Media Applications in Public Relations and Advertising is a pivotal reference source that provides vital research on the application of new media tools for running successful public relations and advertising campaigns. While highlighting topics such as digital advertising, online behavior, and social networking, this book is ideally designed for public relations officers, advertisers, marketers, brand managers, communication directors, social media managers, IT consultants, researchers, academicians, students, and industry practitioners.

Automotive Human-Machine Interaction (HMI) Evaluation Method Jun Ma, Zaiyan Gong, 2024-05-15. This book focuses on the evaluation methodology for automotive human-machine interaction (HMI), which aims to reduce driving distractions, lower operational loads, optimize user experience, design, and enhance user value. The book is divided into three parts. The first part, consisting of Chapters 1-3, introduces the evolution of automotive HMI and proposes a three-dimensional orthogonal evaluation system for automotive HMI that is comprehensive, systematic, and quantifiable. This evaluation system incorporates all evaluation items into a spatial matrix consisting of three dimensions: interaction tasks, interaction modalities, and evaluation indexes. The second part provides a comprehensive presentation and in-depth discussion of the evaluation indexes. The three rational evaluation indexes are utility, safety, and efficiency, which can be tested by the real car driving simulator. The four emotional evaluation indexes are cognition, intelligence, value, and aesthetics. In order to standardize the latter two subjective indexes, this book summarizes common differences in value between Chinese and European users and organizes typical aesthetic orientations in automotive UI based on art history research. The third part introduces the application of this HMI evaluation system in the automotive R&D process, including how to integrate the evaluation into a real product development process to achieve efficient product iteration. This book is suitable for intelligent cockpit and HMI designers, engineers, and researchers. It is also used as a reference for product managers and students in the field of intelligent connected vehicles.

Htc U11 User Guide Mike Jacobs, 2017-10-17. The HTC U11 boasts an all-star cutting-edge camera and remarkable specs.
