Go with Science P4 Wb (brunei) , *The Changing Era of Diseases* Yun-Chul Hong,2019-01-22 The Changing Era of Diseases not only explores how to end humanity s suffering from illness but also attempts to explain the challenging problems that may arise from the control of future disease It provides a novel perspective on how to understand the changing patterns of disease disease development and defense from an evolutionary point of view in an effort to ally the life sciences and historical approaches Topics cover the origin of disease its pandemic infectious manifestation chronic and late chronic diseases strategies of the human body to fight diseases methods of ending diseases and future medical systems are featured The book is a valuable source for researchers interested in systematic approaches to disease and students who are interested in understanding the evolution of diseases and how we have succeeded in fighting them Presents the concept of disease by demonstrating the transition of disease from hunter gatherers to chronic diseases in the modern society Demonstrates how the concept of mechanistic causality does not allow us to properly understand chronic diseases Discusses the role that science and technology play in prolonging human life spans and how that will lead to new healthcare challenges in the future

Biohacked Brandon J. Weichert,2023-05-16 When COVID 19 erupted from Wuhan China under mysterious circumstances the Communist Party of China covered up its existence for as long as possible It is now apparent that there is more to COVID than what the authorities wish for us to know Biohacked China s Race to Control Life details the decades long pursuit by the Chinese Communists to dominate the biotechnology industry to control the very building blocks of life on Earth to further their political control at home and their supremacy abroad More appalling than the

egregious cover up that China's rulers engaged in with COVID 19 is the fact that Western scientists pharmaceutical companies and research labs have contributed to China's rapid and dangerous growth in the biotech industry so much so that China not the United States may become the seat of the biotechnology industry The Chinese leadership believes that biotechnology is a critical industry for the Communist Party to achieve its China Dream of becoming the world's dominant superpower by 2049 In China's biotech sector truly macabre practices are being developed from ambitious cloning programs to the creation of potential pathogens that China's military plans to use in specific genetic attacks against Beijing's growing list of political enemies To stop the threat author Brandon J Weichert proposes the world's nations create a comprehensive set of treaties for regulating biotechnology research and development Further Weichert calls for Washington to slow the transfer of advanced biotechnology knowledge and funding from the United States to China using means like the Foreign Corrupt Practices Act and the Committee on Foreign Investment in the United States CFIUS Unless an all of government and society approach is taken to curbing irresponsible biotech development in China then another deadlier COVID 19 like pandemic could be at hand

Off-Earth Erika Nesvold, 2024-10-01 Can we do better in space than we've done here on Earth We've pinpointed the destination refined the technology designed the habitat outfitted our space residents Are we forgetting something A timely reminder that it's not just rocket science this thought provoking book explores the all too human issues raised by the prospect of settling in outer space It's worth remembering Erika Nesvold suggests that in making new worlds we don't necessarily leave our earthly problems behind Accordingly her work highlights the complex ethical challenges that accompany any other worldly venture questions about the environment labor rights and medical ethics among others Any such venture Nesvold contends must be made on behalf of all humanity with global input and collaboration Off Earth thus includes historical and contemporary examples from outside the dominant Western US abled and privileged narrative of the space industry Nesvold calls on experts in ethics sociology history social justice and law to launch a hopeful conversation about the potential ethical pitfalls of becoming a multi planet species and ideally to shed light on similar problems we presently face here on Earth Space settlement is rapidly becoming ever more likely Will it look like the utopian vision of Star Trek Or the dark future of Star Wars Nesvold challenges us to decide
