Laxminarayan, Marleen Temmerman, Neff Walker, 2016-04-11. The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. nonsexually transmitted infections infertility and violence against women 2 Investments in the continuum of care can have significant returns for improved and equitable access health poverty and health systems 3 There is a large difference in how RMNCH conditions affect different income groups investments in RMNCH can lessen the disparity in terms of both health and financial risk
