Understanding Multimodal Discourses in English Language Teaching Textbooks Christopher A. Smith,2022-08-11 Textbooks are indispensable components and in some case the cornerstones of the mission of English Language Teaching ELT However they are artefacts of a pedagogical culture that rarely echo the concerns of their most prolific consumers teachers and students This book offers a useful framework for evaluating ELT textbooks from a critical discourse perspective one that is based on sound current research but also offers practical guidance to teachers Building from a foundational understanding of ELT textbooks the author presents a systematic procedure to critically analyze their multimodal discourse examine how those discourses are negotiated between teachers and students in class and measure how those consumers privately value the lessons The book provides teachers with the tools they need to select and adapt materials based on critical multimodal discourse analysis where not only the text but the pictures websites audio visual elements too are subjected to a process which can reveal underlying ideologies assumptions omissions and reifications The triangulated approach demonstrated in a series of vignettes featuring Korean university students and native English speaking instructors can inform textbook choice instigate change and inspire lesson re contextualization to best suit the needs of its primary consumers

Collective Improvisation in a Teacher Education Community Linda Farr Darling, Gaalen Erickson, Anthony Clarke, 2007-06-04 As has been well illustrated in the other books in this series the notion of self study of teaching and teacher education practices has been taken up by teachers and teacher educators as they have searched for new ways of better understanding the complex work of teaching and learning Self study appears to be attractive to practitioners because a self study approach to researching practice is largely driven by their questions issues and concerns Therefore one immediate value of self study is in the way it can inform and almost immediately influence practice This book edited by Linda Farr Darling Gaalen Erickson and Tony Clarke offers an in depth investigation of the CITE program A Community of Inquiry in Teacher Education and is one of the few examples of that which might be described as an institutional self study Loughran 2005 As such the book illustrates the level of commitment and concern that these teacher educators have for their teacher education practices and for the learning about teaching of their student teachers They demonstrate that it is crucial to question the taken for granted and that in so doing to be careful to seek to be appropriately responsive to disconfirming data
