sample of developing countries covering the period 2000-14 we show that i average annual portfolio flows to FMs as a share of GDP outstripped those to EMs by about 0.6 percentage points of GDP ii during years of heightened stress in global financial markets portfolio flows to FMs dried up like those to EMs and that iii FMs have become more integrated into international financial markets Our findings confirm that in terms of portfolio flows FMs have become more similar to EMs than to the rest of LIDCs and are therefore more vulnerable to swings in global financial markets conditions Accordingly it is important to have in place frameworks to strengthen FMs resilience to adverse capital flows shocks **Closing the Gap**

Vicky Neale, 2017 Since 2013 mathematicians from around the world have made dramatic progress on a problem in number theory that goes back centuries the Twin Primes Conjecture which asserts that there are infinitely many pairs of prime numbers that differ by 2 for example 17 and 19 is such a pair This book describes two stories that of the recent work on the Twin Primes Conjecture and in parallel the related ideas around primes from the previous two thousand years of mathematics

Foundations of Education: An EMS Approach National Association of EMS Educators (NAEMSE), 2019-07-15 The evolving field of emergency medical services EMS requires professional educators who are knowledgeable about teaching and learning strategies classroom management assessment and evaluation technology in learning legal implications in education program infrastructure design and administering programs of excellence to meet state and national accreditation guidelines Foundations of Education An EMS Approach Third Edition provides EMS educators with the tools ideas and information necessary to succeed in each of these areas The content reflects how current educational knowledge and theory uniquely apply to EMS students educators and programs This textbook is used in the NAEMSE Instructor Courses and is an excellent reference for all EMS educators as well as educators in allied health professions Evidence Based Content In addition to foundational topics such as teaching philosophy and classroom management the text covers brain based learning accreditation and program evaluation emerging technologies and assessment strategies It guides educators to write objectives prepare lesson plans and deliver education in engaging ways to maximize student learning Grounded in this information EMS educators can promote effective education regardless of the type of course or setting Highlights Covers current educational theory and teaching methodologies specific to EMS Meets and exceeds the latest DOT National Guidelines for Educating EMS Instructors Offer practical advice and scenarios in the form of Teaching Tips and Case in Points *Push Factors and Capital Flows to Emerging Markets* Mr. Eugenio Cerutti, Mr. Stijn Claessens, Mr. Damien Puy, 2015-06-22 This paper analyzes the behavior of gross capital inflows across 34 emerging markets EMs We first confirm that aggregate inflows to EMs co move considerably We then report three findings i the aggregate co movement conceals significant heterogeneity across asset types as only bank related and portfolio bond and equity inflows do co move ii while global push factors in advanced economies mostly explain the common dynamics their relative importance varies by type of flow and iii the sensitivity to common dynamics varies significantly across borrower countries with market structure

characteristics especially the composition of the foreign investor base and the level of liquidity rather than borrower country's institutional fundamentals strongly affecting sensitivities. Countries relying more on international funds and global banks are found to be more sensitive to push factors. Our findings suggest that EMs need to closely monitor their lenders and investors to assess their inflow exposures to global push factors.

Lead Market India Cornelius Herstatt, Rajnish Tiwari, 2016-11-26 India is still perceived by some as a developing country that has yet to create world class products of its own. However, this book shows that in recent years India has emerged as a lead market for frugality driven innovations that are affordable, robust and successful even outside its geographic boundaries. Many global companies have recognized these changes and are ramping up their local R D capabilities. At the same time, several Indian firms are venturing out to international shores and gaining access to new markets. Using a top down approach, the book takes a closer look at systems of innovation at work and presents examples of successful corporate innovations in multiple industries and their contextual conditions.

Bank Balance Sheets and External Shocks in Asia: The Role of FXI, MPMs and CFMs Zefeng Chen, Miss Sanaa Nadeem, Mr. Shanaka J Peiris, 2021-01-15 In emerging Asia, banks constitute the dominant source of financing consumption and investment, and bank balance sheets comprise large gross FX assets and liabilities. This paper extends the DSGE model of Gertler and Karadi (2011) to incorporate these key features and estimates a panel vector autoregression on ten Asian economies to understand the role of the banking sector in transmitting spillovers from the global financial cycle to small open economies. It also evaluates the effectiveness of foreign exchange intervention (FXI) and other macroeconomic policies in responding to external financing shocks. External financial shocks affect net external liabilities of banks and the exchange rate, leading to changes in credit supply by banks and investment. For example, a capital outflow shock leads to a depreciation that reduces the net worth and intermediation capacity of banks exposed to foreign currency liabilities. In such cases, the exchange rate acts as a shock amplifier, and sterilized FXI often deployed by Asian economies can help cushion the economy. By contrast, with real shocks, the exchange rate serves as a shock absorber, and any FXI that weakens that function can be costly. We also explore the effectiveness of the monetary policy, interest rate, macroprudential policies, MPMs, and capital flow management measures, CFMs.

The In-Situ Approach to Sluicing Jun Abe, 2015-04-15 It has been standardly claimed since Merchant (2001) that island violations can be repaired by simply deleting the categories that induce such violations, as witnessed by sluicing. An ellipsis construction that deletes TP with a remnant wh phrase. This book aims to argue that such repair by ellipsis is simply a myth. Alternatively, the author argues for what is called the in situ approach to sluicing, originally proposed by Kimura (2007, 2010) according to which the remnant wh phrase in sluicing stays in situ. This approach immediately explains the island insensitivity of sluicing since no overt wh movement is involved in the derivation of this construction. Hence, it challenges the approach in terms of island repair by ellipsis in that it nullifies the necessity of a repair mechanism. This book makes an important contribution to the field in providing an alternative way of approaching ellipsis.

The Corporate Bond Market Boom in Emerging Economies* Ms. Diana Ayala Pena, Milan Nedeljkovic, Christian Saborowski, 2015-07-07 This paper studies the determinants of shifts in debt composition among EM non financial corporates We show that institutions and macro fundamentals create an enabling environment for bond market development During the recent boom episode however global cyclical factors accounted for most of the variation of bond shares in total corporate debt The sensitivity to global factors appears to vary with relative bond market size which we interpret to be associated with liquidity and easy entry and exit rather than local fundamentals Foreign bank linkages help explain why bond markets increasingly substituted for banks in channeling liquidity to EMs Our results highlight the risk of capital flow reversal in EMs that benefited from the upturn in the global financial cycle mostly due to their liquid markets rather than strong fundamentals **Seventh Periodic Monitoring Report on the Status of Implementation Plans in Response to Board-Endorsed IEO Recommendations** International Monetary Fund, 2015-04-09 The Seventh PMR includes i a discussion of progress made over the last year on the actions corresponding to four Management Implementation Plans MIPs that were classified as still in progress in the previous PMR and ii an assessment of the progress made in achieving the high level objectives in three areas directly related to those MIPs In addition an update on substantive issues related to five older MIPs agreed since 2007 is provided at the end of the report Three new evaluations have been completed by the IEO since March 2014 In July and August 2015 Management issued the MIPs in response to these evaluations Given that only a short time has passed since their completion progress in addressing the actions contemplated in those MIPs will be discussed in the next PMR **The Impact of Climate Change on Our Life** Abdelnaser Omran, Odile Schwarz-Herion, 2018-02-23 This book introduces the highly topical issue from many different angles sensitizing readers to the various challenges to human life posed by climate change identifying possible intentional and inadvertent anthropogenic factors and consequences and seeking socially and environmentally viable solutions The book begins by examining the impact of the climate change discussion on science politics economy and culture from its historical

origin in the first Club of Rome Report and its inclusion in the UN's SDGs to the Paris Agreement and beyond. Comprising 12 chapters, it analyses the factors which caused the catastrophic 2014 Kelantan flood in Malaysia, focusing on the Kuala Krai district and discusses mud architecture in Wadi Hadramout, Yemen, and mitigating the expected effects of climate change on this unique architecture and cultural heritage. It also examines the economic costs of climate change on health and the increased burden on individual expenditures and national health systems. The role of climate change in the water-energy nexus and efforts to increase efficiency in energy and water end use to increase Queensland's agricultural sector's resilience in Australia is addressed, as is water security and climate change issues in developing countries and the potential of partnership procurement strategies for managing sustainable urban water supply in Nigerian cities. It also includes a chapter offering a new approach to waste management, exploring to what extent waste can complicate our daily actions and influence environmental decay, and recommending that renewable materials be sorted and separated from other types of materials to avoid cross-contamination, to increase the value of the materials, and to ease the process of manufacturing. Subsequent chapters identify factors sustaining the municipal solid waste management and practices in Ajdabiya city in Libya and look at accounting disclosure remedies by exploring areas in which sustainability reporting could expand beyond corporate environmental reporting to additional disclosures curbing recklessness in pursuing merely economic goals. The book shows from the perspective of agriculture how human activities can increase the negative impacts of climate change on lifestyle in Malaysia, suggesting alternative lifestyles and encouraging international cooperative efforts. The last chapters evaluate the impacts of various environmental factors on the local tourism sector in Pakistan and discuss strategies to tackle climate change, focusing on the opportunities and risks of climate engineering. Since these risks encompass inadvertent negative effects and targeted abuse for covert weather warfare and terrorism that violate the UN's ENMOD convention, the author recommends viable alternatives to deal with climate change.
