

20. What are the women doing with saliva and hair samples?
They are checking out the genetic fingerprint of their boyfriends to see what kind of "catch" they have made in a date, or mate.
21. What does Irene read on the printout?
Irene reads Jerome's genetic fingerprint and thinking that it is Vincent's, concludes that he is "quite a catch."
22. What DNA source incriminates Vincent?
The inspector finds an eyelash that belongs to Vincent in GATTACA.
23. Who does the crime investigator turn out to be?
The crime investigator turns out to be Anton, Vincent's brother.
24. How is Vincent finally exposed at the GATTACA spaceport?
Seconds before his flight, Vincent is asked to take a final urine test. He fails the test because he did not carry along a urine pouch with Jerome's urine.
25. Why does the doctor let him through anyway?
The doctor has a son that was not genetically what he should have been. The doctor tells Vincent that the doctor's son admires Vincent. The doctor seems to understand Vincent's dream and ambition. The doctor hints that he's known about, or been suspicious about Vincent because the doctor has been witness to Vincent's urine tests: "Right handed-men don't hold it with their left."

CONNECTIONS-SCIENCE FICTION TO FACT

1. There are many hidden meanings in the words used in this film.
What does the word GATTACA mean?
The letters are taken from the letters that represent the four nitrogenous DNA bases: A adenine, T thymine, G guanine, C cytosine.
2. How about the name Eugene? (Hint: what other biology words start with "eu?")
The name Eugene can refer to eugenics, which is the science of improvement of the human race through the application of genetics. Other biology words that start with "eu" are: eukaryotic (having a true nucleus), euchromatin (active genes), euglena (both plant and animal), and eustachian tube (the auditory canal). The root "eu" in biology means "true."
3. After watching this film, how do you think genetic screening today might affect a person's ability to get a job, or get health insurance? Explain.
If a genetic disease is discovered, it could result in higher premiums for health insurance, denial of claims because of a pre-existing condition, or denial of health insurance. Some employers may not hire people that might have a disease that results in poor attendance or becoming disabled. Some employers may not hire people they deem to be a safety risk to themselves, or the public.

Critical Thinking Marco Jameson, 2020-10-02 This is a 3 book bundle which addresses various subtopics including but not limited to these Book 1 Many people don't understand what critical thinking is Moreover not all the ones that do apply it in their daily lives Politics the media and so many other aspects of society show how small the number is of people who use their brains Critical thinking means among others that you look at multiple sides of a controversial topic that you can stay objective and put away your biases until you have reached a firm conclusion based on verifiable facts This skill is highly valuable in job interviews relationships and everyday life In order to improve your critical thinking skills it would be best to adopt the best practices that help you accomplish this task In other words some things help you develop this skill others are a waste of time and effort or even worse go against it and cause a degeneration of your intellect and open minded attitude Book 2 What makes someone a critical thinker The attributes of such a person are elaborately described in this book Alongside with that the book highlights the many benefits of critical thinking an often neglected brain skills society needs to improve on However most of the book is focused on relevant and irrelevant reasoning So often we attribute certain consequences to the wrong causes We jump to conclusions based on limited information emotions or generalizations This book will clear all that up by giving you new insights to determine what is relevant and what is not Book 3 What is a fallacy Many people may have heard the word before but don't grasp the magnitude of it They erroneously assume that they aren't guilty of embracing half truths or false conclusions And yet those are often the ones who do it the most In this guide you will receive greater comprehension of what fallacies are and close your blind spot to the truth of things Later the author goes on to instruct you on inductive and deductive reasoning which are two techniques that help people reach logical conclusions without going astray in their paths of thinking Last but not least a long chapter is devoted to developing moral character our conscience and our ethics Everything can be justified but to live with our conscience is an art by itself

Critical Thinking: Keys to Asking Questions (Part Two) Brenda Rollins, 2013-05-01 This is the chapter slice Keys to Asking Questions Part Two from the full lesson plan Critical Thinking With Critical Thinking Students will gain the ability to not only understand what they have read but how to build upon that knowledge independently by examining such skills as

independent thinking organization asking questions and problem solving Definitions of important terms and many opportunities to practice the skills being taught make our resource user friendly and easy to understand In addition the objectives used in this book are structured using Bloom s Taxonomy of Learning to ensure educational appropriateness You will be able to teach students the basic skills they will need to become critical thinkers What they will learn from our resource will be just the beginning of a critical thinking journey that will continue through college and into adulthood All of our content meets the Common Core State Standards and are written to Bloom s Taxonomy *Question Authority; Think for Yourself* Beverly A. Potter, Mark James Estren, 2022-01-10 We have freedom of speech but we re afraid to speak Our lives have become subjected to PC tyranny a constant fear of offending someone We think that we are independent and that it is the other guy who is influenced brain washed duped persuaded We feel like we think for ourselves How can we feel otherwise There s no way to know because countless influences and interactions have molded us We re members of various groups circles of friends family professional groups hobby group and workplace groups Groups have a way of developing a view that it imposes with a kind of group think We want to belong to be liked and included so go along and get along We don t make waves by questioning If we have a different view we keep it to ourselves Why rock the boat Thinking for yourself is not so easy When encountering an argument to a long held opinion or a wild idea we use critical thinking to evaluate it as we were taught to do in school The problem is that critical thinking is critical It focuses our thinking on the negative what doesn t work what s wrong with the idea and encourages my side thinking where we evaluate evidence in a way that favors our beliefs and entraps us into closed mindedness Thinking for yourself requires open mindedness Open mindedness is being receptive and when the issue is important calls for actively searching for evidence against your beliefs Thinking is not driven by answers but by questions Every intellectual field is born out of a cluster of questions to which answers are needed Had no questions been asked by those who laid the foundation for a field for example Physics or Biology the field would never have been developed We define tasks express problems and delineate issues with questions Answers signal an end point and stop thought except when an answer generates a further question Timothy Leary said to think for yourself you must question authority To think you must question To think through or rethink anything one must ask questions that stimulate thought The quality of your questions determines the quality of your thinking Thinking begins within some content when questions are generated No questions equals no understanding To engage in thinking through your content you must stimulate your thinking with questions that lead to further questions Our own opinions is one authority we should frequently question Times change We change Perspectives and values change Book explores how opinions and values we held in the past need periodic evaluation and challenge Independent thinkers evolve and need to shed the shackles of old views and opinions Ridicule is the strongest weapon for pressing us to conform It is a kind of bait that if you go for it will entrap you in an argument you can t win and leave you looking ridiculous and deflated Question Authority Think for Yourself offers techniques with examples of

how to deflect attacks side tracks and put downs If you ve bitten your tongue and later wished you d spoken up and not been cowed into silence by a mocking co worker when you revealed a politically incorrect viewpoint you ll find much of interest in Question Authority Think for Yourself **Critical Thinking & Socratic Questioning Mastery - 2 Books In 1**
