Designing Interaction and Interfaces for Automated Vehicles Neville Stanton, Kirsten M. A. Revell, Patrick Langdon, 2021-03-10 Driving automation and autonomy are already upon us and the problems that were predicted twenty years ago are beginning to appear These problems include shortfalls in expected benefits equipment unreliability driver skill fade and error inducing equipment designs *Designing Interaction and Interfaces for Automated Vehicles* User Centred Ecological Design and Testing investigates the difficult problem of how to interface drivers with automated vehicles by offering an inclusive human centred design process that focusses on human variability and capability in interaction with interfaces This book introduces a novel method that combines both systems thinking and inclusive user centred design It models driver interaction provides design specifications concept designs and the results of studies in simulators on the test track and in road going vehicles This book is for designers of systems interfaces interactions UX Human Factors and Ergonomics researchers and practitioners involved with systems engineering and automotive academics

_ In this book Prof Stanton and colleagues show how Human Factors methods can be applied to the tricky problem of interfacing human drivers with vehicle automation They have developed an approach to designing the human automation interaction for the handovers between the driver and the vehicle This approach has been tested in driving simulators and most interestingly in real vehicles on British motorways The approach called User Centred Ecological Interface Design has been validated against driver behaviour and used to support their ongoing work on vehicle automation I highly recommend this book for anyone interested or involved in designing human automation

interaction in vehicles and beyond Professor Michael A Regan University of NSW Sydney AUSTRALIA **Proceedings of the 21st Congress of the International Ergonomics Association (IEA 2021)** Nancy L. Black, W. Patrick Neumann, Ian Noy, 2021-04-30 This book presents the proceedings of the 21st Congress of the International Ergonomics Association IEA 2021 held online on June 13-18 2021 By highlighting the latest theories and models as well as cutting edge technologies and applications and by combining findings from a range of disciplines including engineering design robotics healthcare management computer science human biology and behavioral science it provides researchers and practitioners alike with a comprehensive timely guide on human factors and ergonomics It also offers an excellent source of innovative ideas to stimulate future discussions and developments aimed at applying knowledge and techniques to optimize system performance while at the same time promoting the health safety and wellbeing of individuals The proceedings include papers from researchers and practitioners scientists and physicians institutional leaders managers and policy makers that contribute to constructing the Human Factors and Ergonomics approach across a variety of methodologies domains and productive sectors This volume includes papers addressing the following topics Activity Theories for Work Analysis and Design ATWAD Organisation design and management ODAM Ergonomic Work Analysis and Training EWAT Systems HF E HF E Education and Professional Certification Development Remote Sensing for Archaeology and Cultural Landscapes Diofantos G. Hadjimitsis, Kyriacos Themistocleous, Branka Cuca, Athos Agapiou, Vasiliki Lysandrou, Rosa Lasaponara, Nicola Masini, Gunter Schreier, 2019-06-07 This book investigates the added value that satellite technologies and remote sensing could provide for a more sustainable mapping monitoring and management of heritage sites be it for purposes of regular maintenance or for risk mitigation in case of natural or man caused hazards One of the major goals of this book is to provide a clear overview on policy perspectives regarding both space policy as well as heritage policy and to provide possible suggestions for common ground of these two fields in Europe and around the world Readers will develop a good understanding of cutting edge applications of remote sensing and geographic information science and the challenges that affect heritage maintenance and protection Particular attention is given to Earth observation and remote sensing techniques applied in different locations This book brings together innovative technologies concrete applications and policy perspectives that can lead to a more complete vision of cultural heritage as a resource for future development of our society as a whole Doing Experimental Media Archaeology Tim van der Heijden, Aleksander Kolkowski, 2022-12-31 In recent years there has been a growing interest in the use of experimental approaches to the study of media histories and their cultures Doing media archaeological experiments such as historical re enactments and hands on simulations with media historical objects helps us to explore and better understand the workings of past media technologies and their practices of use By systematically reflecting on the methodological underpinnings of experimental media archaeology as a relatively new approach in media historical research and teaching this book aims to serve as a practical handbook for doing media archaeological experiments Doing
