Gender and Fair Assessment Warren W. Willingham,Nancy S. Cole,2013-12-16 There have been many important changes in the participation of women and men in American society over the past quarter century Tests play a role in those changes by providing evidence of the diverse achievement and proficiency of women and men They aid the learning process and reflect inequalities in opportunity to learn and participate In addition they provide useful information in considering what alternatives in education and work make most sense for individuals and influence views about groups of students educational programs and a wide range of issues For all of these reasons it is important that tests assess fairly and reflect accurately the ways young people are and are not achieving as well as desired The test performance of women and men is a research topic of historical interest and has received much attention in recent years Because of this increased interest there is a great deal of new research and data available The purpose of the study presented in this volume was to review this new information with two objectives in mind to clarify patterns of gender difference and similarity in test performance and related achievements and to see what implications those findings might have for fair assessment and as a corollary examine the assessment process as a possible source of gender differences This study is interested in tests used in education to assess developed knowledge and skill In order to gain a broader view of gender similarity and difference the contributors looked at other types of measures and other characteristics of young women and men Their hope is to contribute to a firmer basis for insuring fairness in tests an objective which is particularly important as the field moves increasingly to new forms of assessment in which there is less experience

Natural Science Teaching in Great Britain Arthur Jay Klein,Glen Levin Swiggett,John Dorsey Wolcott,Mary Burchard Orvis,Peter Henry Pearson,United States. Bureau of Education,United States. Office of Education. Statistical Division,Walter Alexander Montgomery,Walton Simon Bittner,William Orr,1919

Qualifications Sjur Bergan,Council of Europe,2007-01-01 Qualifications are a key element of higher education policies in general and of the Bologna Process in particular Much work has been accomplished in this area over the past few years and a proper understanding of qualifications is essential to making the European Higher Education Area a reality This book provides a systematic overview of the concept of qualifications discusses its main elements such as level workload quality profile and learning outcomes examines generic and subject specific competences The author also considers the development of qualifications frameworks and explores the impact of our understanding of the concept of qualifications on recognition Sjur Bergan is Head of the Department of Higher Education and History Teaching of the Council of Europe a member of the Bologna Follow Up Group

and one of the authors of the Council of Europe UNESCO Recognition Convention He has played an active role in the development of the overarching qualifications framework of the European Higher Education Area

Blameworthy Belief Nikolaj Nottelmann, 2007-07-18 Believing the wrong thing may sometimes have drastic consequences The question as to when a person is not only ill guided but genuinely at fault for holding a particular belief is an important one It touches upon the roots of our understanding of such notions as criminal negligence and moral responsibility The answer to this question may influence the extent to which we are willing to submit each other to punishments ranging from mild resentment to harsh prison terms This book presents an extensive effort to shed light on the conditions under which we may appropriately deem someone blameworthy for holding a particular belief It regiments and unifies several debates within contemporary epistemology ethics and legal scholarship Finally the book brings a new philosophical look on issues like our power to control beliefs and the extent and nature of foresight

Transparency in Assessment - Exploring the Influence of Explicit Assessment Criteria Anders Jönsson, Frans Prins, 2019-04-03 In many schools and higher education institutions it has become common practice to share assessment criteria with students Sometimes it is required for accountability purposes at other times criteria are used as a means to communicate expectations to students However the idea that explicit assessment criteria should be shared with students has been contested On the one hand research has shown that explicit criteria may positively affect student performance reduce their anxiety as well as support students use of self regulated learning strategies On the other hand there are fears that explicit criteria may have a restraining influence on students learning as well as limiting their autonomy and creativity There are also indications of students becoming more performance oriented as opposed to learning oriented when being provided with explicit assessment criteria Taken together it is not fully understood under which circumstances it is productive for student learning to share explicit assessment criteria and under which circumstances it is not In particular empirical research on the proposed negative effects of sharing criteria with learners is limited and most fears voiced in the literature are based on individual experiences and anecdotal evidence In this book we therefore bring different perspectives on transparency in assessment together in order to further our understanding of how students are influenced by the use of explicit assessment criteria A deeper understanding of the influence of explicit assessment criteria on students understanding of criteria motivation and learning is equally imperative for future research and educational practice both of which need to go beyond individual opinions and convictions
