*Complex Worlds* Andrienne Lamberti, Anne Richards, 2017-03-02 *Complex Worlds* Digital Culture Rhetoric and Professional Communication is a collection of thought provoking scholarly essays by teachers and industry practitioners in professional communication and technology oriented fields. Scrupulously edited for a range of readers, the collection aims to help familiarize advanced students, teachers, and researchers in professional communication, computers, and writing literacy and sister disciplines with key issues in digital theory and practice. An emphasis on the situations of and audiences for digital communication identifies *Complex Worlds* as a rhetorical approach. In an era when globalizing markets and digital technologies are transforming culture around the world, readers should find the collection both engaging and timely. The collection's twelve essays constitute a diverse and thematically coherent set of inquiries. Included are explorations of topics such as cyber activism, digital dispositio, citizen and open source journalism, broadband affordances, XML digital resumes, avant garde performance art, best pedagogical practices, and intercultural communication between East and West, North and South. The text is especially well suited for advanced courses in professional and applied writing, contemporary rhetorics, and digital culture. The complexity highlighted in the collection's title is brought into relief by authors who address how the digital is daily unmaking our assumptions about the boundaries between work and school, the global and the local, the private and the public. *Complex Worlds* offers readers an opportunity to build on their rhetorical awareness by expanding their understanding of the means, aims, and strategies of effective communication today and in the future.

**Handbook of Research on Developing Circular, Digital, and Green Economies in Asia** Ordóñez de Pablos, Patricia, 2021-07-09 The COVID 19 pandemic has caused extraordinary disruptions in societies, companies, and nations across the globe. In response to this global devastation, companies need to develop business and management practices to answer new and emerging challenges and speed the recovery of economies, the creation of new jobs and prosperity, and achieve sustainable growth. The transition to digital and greener economies offers important challenges and opportunities for people, companies, cities, and governments. The *Handbook of Research on Developing Circular, Digital, and Green Economies in Asia* explores new and emerging business and management practices to support companies and economies in the digital transformation in Asia, with special emphasis on success and failure experiences. This book will analyze the role of digital skills and competences, green issues, and technological disruptors in these emerging practices in Asia and how they can contribute to the creation of new business opportunities, more jobs, and growth for the recovery of Asian economies after the pandemic. Covering topics including consumption, values, psychological capital, and tourist culture, this book is essential for academicians, economists, managers, students, politicians, policymakers, corporate heads of firms, senior general managers, managing directors, information technology directors, and managers, libraries, and researchers.

**Hayes' Principles**

**and Methods of Toxicology** A. Wallace Hayes, Tetyana Kobets, 2023-07-03 Hayes Principles and Methods of Toxicology has long been established as a reliable and informative reference for the concepts, methodologies, and assessments integral to toxicology. The new edition contains updated and new chapters with the addition of new authors while maintaining the same high standards that have made this book a benchmark resource in the field. Key Features: The comprehensive yet concise coverage of various aspects of fundamental and applied toxicology makes this book a valuable resource for educators, students, and professionals. Questions provided at the end of each chapter allow readers to test their knowledge and understanding of the material covered. All chapters have been updated, and over 60 new authors have been added to reflect the dynamic nature of toxicological sciences. New topics in this edition include Safety Assessment of Cosmetics and Personal Care Products, The Importance of the Dose Rate Response, Novel Approaches and Alternative Models, Epigenetic Toxicology, and an Expanded Glossary. The volume is divided into 4 major sections addressing fundamental principles of toxicology: Section I Principles of Toxicology, major classes of established chemical hazards; Section II Agents, current methods used for the assessment of various endpoints indicative of chemical toxicity; Section III Methods, as well as toxicology of specific target systems and organs; Section IV Organ and System Specific Toxicology. This volume will be a valuable tool for the audience that wishes to broaden their understanding of hazards and mechanisms of toxicity and to stay on top of the emerging methods and concepts of the rapidly advancing field of toxicology and risk assessment. Advances in Speech Recognition Amy Neustein, 2010-09-21 Two Top Industry Leaders Speak Out. Judith Markowitz: When Amy asked me to co-author the foreword to her new book on advances in speech recognition, I was honored. Amy's work has always been infused with creative intensity, so I knew the book would be as interesting for established speech professionals as for readers new to the speech processing industry. The fact that I would be writing the foreword with Bill Scholz made the job even more enjoyable. Bill and I have known each other since he was at UNISYS, directing projects that had a profound impact on speech recognition tools and applications. Bill Scholz: The opportunity to prepare this foreword with Judith provides me with a rare opportunity to collaborate with a seasoned speech professional to identify numerous significant contributions to the

field offered by the contributors whom Amy has recruited Judith and I have had our eyes opened by the ideas and analyses offered by this collection of authors Speech recognition no longer needs be relegated to the category of an experimental future technology it is here today with sufficient capability to address the most challenging of tasks And the point click type approach to GUI control is no longer sufficient especially in the context of limitations of mode day hand held devices Instead VUI and GUI are being integrated into unified multimodal solutions that are maturing into the fundamental paradigm for comput human interaction in the future Annual Report to Congress United States.
