Environmental And Natural Resource Economics 5th Edition:

Environmental and Natural Resource Economics Jonathan M. Harris, Brian Roach, 2021-11-28 Environmental issues are of fundamental importance and a broad approach to understanding the relationship between the human economy and the natural world is essential. In a rapidly changing policy and scientific context, this new edition of *Environmental and Natural Resource Economics* reflects an updated perspective on modern environmental topics. Now in its fifth edition, this textbook includes enhanced and updated material on energy, climate change, greening the economy, population, agriculture, forests, and water, reflecting the greater urgency required to solve the big environmental problems in these areas. It introduces students to both standard environmental economics and the broader perspective of ecological economics, balancing analytical techniques of environmental economics topics with a global perspective on current ecological issues such as population growth, global climate change, and green national income accounting. Harris and Roach's premise is that a pluralistic approach is essential to understand the complex nexus between the economy and the environment. This perspective, combined with its emphasis on real world policies, is particularly appealing to both instructors and students. This is the ideal text for undergraduate classes on environmental, natural resource, and ecological economics and postgraduate courses on environmental and economic policy. Environmental Economics and Natural Resource Management David A. Anderson, 2019-02-14 The tools of environmental economics guide policymakers as they weigh development against nature, present against future, and certain benefits against uncertain consequences. The policies and research findings explained in this textbook are relevant to decisions made daily by individuals, firms, and governments. This textbook offers instructors and students a user-friendly, relevant, and up-to-date introduction to these topics while covering recent advancements in the field and significant political and economic changes. The fifth edition has been thoroughly updated while retaining the story-based narratives and visual emphasis of previous editions, capturing students' attention with full-color photos, graphs, and illustrations. It addresses the impact of changes in world leaders, national priorities, and international agreements, along with key developments in the energy sector. These include the way hydraulic fracturing and the surging popularity of natural gas have revolutionized the fossil fuel industries; how new green energy technologies are bringing prices down and efficiency levels up; and the arrival of innovative energy sources such as ocean thermal energy conversion. *Environmental Economics and Natural Resource Management* promotes environmental and economic literacy with policy-oriented, application-based content, all delivered in concise, accessible discussions. Through its engaging approach, the text brings the economic way of thinking into discussions of personal, community, corporate, and government activities that affect environmental assets and the quality of life.

Economics of the Environment Horst Siebert, 2008-01-03. The book interprets nature and the environment as a scarce resource. It offers a theoretical study of the allocation problem and describes different policy approaches to the environmental problem. The entire spectrum of the allocation issue is studied. The author incorporates several economic approaches including neoclassical analysis, the public goods approach, and optimization theory. The different aspects of environmental allocation are studied in the context of a single model that is used throughout the book. The sixth edition includes new sections on ethical aspects of environmental evaluation and international emission trading and biodiversity.

Out of the Mainstream Rutgerd Boelens, David H. Getches, Jorge Armando Guevara Gil, 2010. Water is not only a source of life and culture. It is also a source of power, conflicting interests, and identity battles. Rights to materially access, culturally organize, and politically control water resources are poorly understood by mainstream scientific approaches and hardly addressed by current normative frameworks. These issues become even more challenging when law and policy makers and dominant power groups try to grasp, contain, and handle them in multicultural societies. The struggles over the uses, meanings, and appropriation of water are especially well illustrated in Andean communities and local water systems of Peru, Chile, Ecuador, and Bolivia, as well as in Native American communities in southwestern USA. The problem is that throughout history, these nation-states have attempted to civilize and bring into the mainstream the different cultures and peoples within their borders instead of understanding context and harnessing the strengths and potentials of diversity. This book examines the multi-scale struggles for cultural justice and socio-economic redistribution that arise as Latin American communities and user federations seek access to water resources and decision-making power regarding their control and management. It is set in the dynamic context of unequal globalizing power relations, politics of scale, and identity, environmental encroachment, and the increasing presence of extractive industries that are creating additional pressures on local livelihoods. While much of the focus of the book is on the Andean

Region a number of comparative chapters are also included These address issues such as water rights and defence strategies in neighbouring countries and those of Native American people in the southern USA as well as state reform and multi culturalism across Latin and Native America and the use of international standards in struggles for indigenous water rights This book shows that against all odds people are actively contesting neoliberal globalization and water power plays In doing so they construct new hybrid water rights systems livelihoods cultures and hydro political networks and dynamically challenge the mainstream powers and politics Publisher s description

Entrepreneurship: Entrepreneurial Orientation, Intention, and Alertness Anna Ujwary-Gil, 2023-01-01 Business consulting knowledge absorptive capacity and innovativeness A triangular model for micro and small enterprises in Poland Abstract PURPOSE This paper proposes a triangular relationship between business consulting knowledge absorptive capacity and innovativeness The role of knowledge absorptive capacity in stimulating the impact of business consulting on innovativeness is studied METHODOLOGY An empirical study is conducted using the CATI method and it is based on data concerning 382 Polish micro and small enterprises Qualitative variables reflecting using business consulting knowledge absorptive capacity and innovativeness are defined The multivariate discrete choice model taking into account relationships among these constructs is proposed and its parameters are estimated FINDINGS The results of the empirical research indicate that business consulting in Poland and similar countries may help firms implement innovative solutions Knowledge absorptive capacity stimulates innovativeness and has a positive impact on the relationship between using business consulting and improvement in innovativeness Though the frequency of using business consulting is an important factor in improving innovativeness cooperation between a consultant and a manager matters more IMPLICATIONS Results of the empirical research indicate that cooperation between a consultant and a manager may help reduce differences of opinion and internal conflicts A higher propensity to cooperate may significantly improve the functioning of an enterprise Business consulting has an indirect and direct effect on innovativeness It has a positive impact on knowledge absorptive capacity while better knowledge stimulates innovativeness ORIGINALITY AND VALUE An original triangular model of the relationship between business consulting knowledge absorptive capacity and innovativeness is proposed Advanced econometric methods are used in order to find complex relationships between using business consulting knowledge absorptive capacity and

improvement in innovativeness Moreover results of the estimation of the parameters of the econometric model provide interesting recommendations for policies supporting the development of business consulting in the Polish economy Keywords business consulting knowledge absorptive capacity innovativeness multivariate discrete choice model development support policy econometric model economy Sustainable development and entrepreneurship in emerging countries Are sustainable development and entrepreneurship reciprocally reinforcing Abstract PURPOSE Entrepreneurship seen as an engine for economic development is especially desirable for emerging countries to support rapid growth Moreover entrepreneurs can support social transformation in favor of more sustainable products and services Sustainable orientation of entrepreneurship contributes to sustainable development goals and prevents environmental deprivation However the sustainable development agenda can also influence entrepreneurship METHODOLOGY The conducted bibliometric analysis confirmed the growing interest among scholars in the correlation of entrepreneurship to sustainability in the last years Furthermore panel regression static model was used to explore the variables on entrepreneurship influencing the sustainable development goal SDG index in emerging countries and Levin Lin and Chu LLC W Stat IPS ADF Fisher Chi Square and PP Fisher Chi Square tests were applied to analyze the variables stationarity In order to examine the existence of structural breaks the robustness was checked on single cross section units and on the whole panel dataset In addition the Hausmann test was used to select between random and fixed effects and heteroskedasticity of residues autocorrelation of residues and dependence of residues between the panels were conducted Data was analyzed through Eviews 13 FINDINGS This paper investigates the relationship between sustainability and entrepreneurship in emerging countries It discusses the impact of sustainable development on entrepreneurship and the influence of entrepreneurship on sustainable development IMPLICATIONS The study results can be used by governments and policymakers to plan their strategies and policies concerning entrepreneurship and implementation of sustainable development goals They should promote entrepreneurial activity and control the negative environmental impact of enterprises simultaneously ORIGINALITY AND VALUE The research addresses the gap in the literature concerning the relationship between sustainable development and sustainable entrepreneurship The paper examines the reciprocal relationship between sustainable development and entrepreneurship with an emphasis on emerging countries Keywords entrepreneurship sustainability sustainable development sustainable entrepreneurship emerging countries entrepreneurs Is Team Entrepreneurial Orientation important in generating creative business ideas The moderating role of team perceived heterogeneity and the individual creative mindset Abstract PURPOSE The study aims to unveil if Team Entrepreneurial Orientation TEO facilitates identification of creative market opportunities understood as novelty and quality business ideas Entrepreneurial Orientation EO has rarely been measured at a team level and few studies have attempted to examine the relationship between EO and actual creative outcomes The proposed research model searches for new patterns that can foster creativity of entrepreneurial teams In addition the research adds the moderating effect of

perceived team heterogeneity and individual creative mindset Growth Creative and Fixed Creative Mindsets as contingency variables to improve the understanding under which circumstances the entrepreneurial teams generate creative business ideas

METHODOLOGY The research sample comprises entrepreneurial teams from the Mondragon Team Academy in the Basque Country Spain The survey data were collected after the entrepreneurial teams performed idea generation The applied experiment of idea generation of entrepreneurial teams has not been generated for the purpose of the study but it formed part of the natural processes of the selected sample of teams The novelty and quality of business ideas were evaluated by experts in the field The data relationships were analyzed through partial least square structural equation modeling PLS SEM

FINDINGS Entrepreneurial Orientation of teams leads to product market entries but not necessarily to novel product market entries Entrepreneurially oriented teams have a greater tendency to generate quality and slightly modified existing business ideas rather than to generate novel market opportunities The applied moderators present different interaction results with the studied relationships Specifically individuals with a Fixed Creative Mindset in a team have an antagonistic interaction on the TEO Quality relationship Team Perceived Heterogeneity and Growth Creative Mindset of individuals have no effect on either the TEO Quality or the TEO Novelty link

IMPLICATIONS The research demonstrates the importance of contextualization of the nature of creativity in EO as a crucial antecedent of market innovations Our study adds to the literature and practice by providing evidence that EO at a team level TEO plays a critical role in exploring product market entries given that TEO facilitates Quality outcomes only Entrepreneurially oriented teams do not easily achieve Novel outcomes that allow them to enter new markets Individuals with Fixed Creative Mindset in a team should be avoided as they block the relationship between Team Entrepreneurial Orientation and Quality Likewise our study supports the validity of Entrepreneurial Orientation at a team level which can lead to more suitable practical implications for a team and its creativity management if applied It could help in developing appropriate team formation and team management practices

ORIGINALITY AND VALUE The study proposes rare and unique EO analysis at a team level and at young companies level start up The study contributes to the original and overlooked in the literature conceptualization of EO within Schumpeter's perspective of creative destruction in entrepreneurial activities The examined theoretical foundations of EO led to clearer antecedents of behavioural effects of entrepreneurial teams towards product market entries The study initiates identifies and calls for new further research lines to contribute to a greater and contingent understanding of how entrepreneurial teams generate creative business ideas especially novel business ideas which are necessary for creative destruction the EO construct itself and overall economic development

Keywords entrepreneurship creativity team entrepreneurial orientation creative outcomes Subjective norms and entrepreneurial intention A moderated serial mediation model

Abstract PURPOSE This study aims to clarify the effect mechanism of subjective norms on entrepreneurial intention The results of how subjective norms contribute to forming start up intention are inconsistent and unclear which is notable in

previous research By integrating the theory of planned behavior and the theory of self efficacy we investigate whether entrepreneurial self efficacy and attitude toward entrepreneurship serially mediate the relationship between subjective norms and intention to start a business In addition this study examines the moderate role of entrepreneurial education on the serial indirect effect of subjective norms on entrepreneurial intention via entrepreneurial self efficacy and attitude toward entrepreneurship

METHODOLOGY This study utilized a sample of 958 master s students in Vietnam to investigate a moderated serial mediation model of subjective norms on entrepreneurial intention Confirmatory factor analysis CFA was carried out to check the reliability and validity of the scales Then the SPSS PROCESS macro developed by Hayes was employed to test the research model Specifically Model 6 was used to examine the serial indirect effect of subjective norms on start up intention and Model 84 was implemented to investigate the moderate effect of entrepreneurial education

FINDINGS The results of this study found that entrepreneurial self efficacy and entrepreneurial attitude significantly mediate subjective norms effect on entrepreneurial intention Especially the results reveal that the serial mediation effect of entrepreneurial self efficacy and attitude toward entrepreneurship was significant and entrepreneurial self efficacy and attitude toward entrepreneurship played a fully mediating role in the relationship between subjective norms and start up intention In addition this study found that the serial mediation effect of subjective norms on start up intention via entrepreneurial self efficacy and entrepreneurial attitude was negatively moderated by entrepreneurial education

IMPLICATIONS The results of this study further clarify the relationship between subjective norms and entrepreneurial intention and the role of entrepreneurial education therefore contributing to narrowing the notable gap between this relationship Besides our study provides several implications for governments and policymakers to promote the intention to start a business The finding of our study indicates that subjective norms are an important factor in promoting entrepreneurial intention Therefore policymakers should take some actions to promote entrepreneurial culture such as strengthening propaganda activities to promote the image of successful entrepreneurs praising businesses and entrepreneurs who contribute to society and giving evidence of their contribution to the development of the country Promoting an entrepreneurial culture may increase peer group pressure on potential entrepreneurs thus enhancing the intention to start a business

ORIGINALITY AND VALUE This study expects to contribute to a better understanding of the effect mechanism of subjective norms on entrepreneurial intention and explain the role of entrepreneurial education in this relationship This study explores the mediating role of entrepreneurial self efficacy and entrepreneurial attitude in the relationship between subjective norms and the intention to start a business Additionally this study demonstrates that entrepreneurial education weakens the serial mediation model of subjective norms on the intention to start a business

overview of the empirical research on entrepreneurial alertness using a systematic literature review method

Abstract

PURPOSE In the last two decades the concept of entrepreneurial alertness EA has been considered a key element in investigating how individuals recognize entrepreneurial opportunities Consequently research on entrepreneurial alertness has grown considerably attracting researchers attention from not only the field of entrepreneurship but also other academic disciplines through which this concept has been studied from a variety of perspectives Therefore it is time to document researchers cumulative knowledge on entrepreneurial alertness The present study aims to provide a comprehensive qualitative review and evaluation of the empirical entrepreneurial alertness research

METHODOLOGY Based on a multi step approach used in previous studies which guarantees a systematic transparent and replicable literature review this study identified a final sample of 84 articles published in scientific journals between 2005 and 2021 that empirically tested the concept of EA The publications were sourced from the Web of Science database Their analysis involved the evolution of published articles the journals that have published the most articles the countries where the research was undertaken the measurement scales that have been used and the research models in which entrepreneurial alertness has been hypothesized and examined through empirical research

FINDINGS The results show that empirical research on entrepreneurial alertness grew significantly from 2016 to 2021 during which period almost 11 articles per year were published Seven of the journals that published the articles contributed 28 percent of the total publications Also the results confirm that most of the empirical research on alertness has been carried out in developing economies from which China stands out with 14 publications representing 16 percent of the total Additionally the results confirm the growing consensus regarding the conceptualization and measurement of entrepreneurial alertness Finally the review resulted in the identification of five broad research models in which EA has been hypothesized and examined through empirical research antecedents consequences mediation moderation and moderated mediation The model examining the consequences or outcomes of entrepreneurial alertness has received the most attention with 59 articles in this context

IMPLICATIONS FOR THEORY AND PRACTICE The identification of concepts and the type of relationship they have with entrepreneurial alertness help evaluate the advances of empirical research as well as the areas of opportunity In this way future studies can strengthen research and thus advance the general knowledge of alertness The most studied topics are also a reflection of the contribution of entrepreneurial alertness toward practice both at the individual and organizational levels In addition researchers interested in entrepreneurial alertness are encouraged to consider the progress made in the measurement of this aspect which offers alternatives for investigation

ORIGINALITY AND VALUE Based on the review of the literature this study organizes the empirical research of entrepreneurial alertness in different research models which provide important insights into its process Moreover this study uncovers potential areas to be addressed and thereby contributes to the study of entrepreneurial alertness

alertness entrepreneurship The linkage between economic literacy and students intention of starting business The mediating role of entrepreneurial alertness Abstract PURPOSE Enhancing the number of entrepreneurs is a major study to combat economic and social problems Psychological factors considered as effective stimulants for entrepreneurial behavior have attracted many researchers in the last decade The purpose of this research attempts to examine how the influence of economic literacy can promote the intention of starting a new business among students and explore the role of entrepreneurial alertness in mediating this relationship METHODOLOGY The research adopted a quantitative approach in which hypotheses were statistically estimated using partial least square structural equation modeling PLS SEM based on survey data using a self administered questionnaire n 450 from several universities in Indonesia FINDINGS The analysis indicates that economic literacy has a significant effect on students entrepreneurial alertness and intention to start a new business Indeed entrepreneurial alertness can mediate the relationship between economic literacy and the intention of starting a new business However among entrepreneurial alertness dimensions scanning and search failed in determining the students intention of starting a new business IMPLICATIONS The result of this research can provide insight into the literature on the entrepreneurship theme and policymakers concerned with delivering new business creation Besides educational institutions can consider the matter of economic literacy to be part of their curricula in order to foster the students intention of starting a business In addition economic literacy also needs to be associated with examples relevant to entrepreneurial activities especially in production distribution and online marketing ORIGINALITY AND VALUE The interesting findings of this paper serve as a reminder that entrepreneurial alertness is one of the predictor variables and mediators for raising the students intention This implies that entrepreneurial alertness can be enhanced by economic literacy as well as how they need to be used to improve course curriculum and the teaching pedagogy Furthermore educational institutions could provide business internship programs and entrepreneurship incubators to raise the students intention of starting business Keywords economic literacy entrepreneurial alertness intention starting business

Environmental and Health Risk Assessment and Management Paolo Ricci, 2006-01-27 This textbook is about the law economics practical assessment and the management of risky activities arising from routine catastrophic environmental and occupational exposures to hazardous agents The textbook begins where emission and exposure analysis end by providing estimates or predictions of deleterious exposures Thus we deal with determining the nature and form of relations between exposure and response damage functions and with the principles and methods used to determine the costs and benefits of risk management actions from the vantage point of single and multiple decision makers Today national and international laws conventions and protocols are increasingly concerned with reducing environmental and health risks through minimizing exposure to toxic substances bacteria viruses and other noxious agents They do so through risk methods The reason for the now worldwide use of risk assessment and management is that individuals and society must decide when and at what cost past and future hazardous conditions can either be avoided or minimized In this process society must account for the limited resources it can spend to remain sustainable Risk based methods play a pivotal role in identifying and ranking alternative sustainable choices while accounting for uncertainty and variability Specifically most reductions in risks require a balancing of the costs and benefits associated with the action to reduce exposure to a hazard and thus risk This balancing necessarily involves linking exposure and response through causation This essential aspect of risk assessment and management if done incorrectly can be costly to society
