Botkin, 2012-09-14 Why do we keep talking about so many environmental problems and rarely solve any If these are scientific issues then why can t

scientists solve them or at least agree on what to do In his new book *The Moon in the Nautilus Shell* ecologist Daniel Botkin explains why For one thing although we live in a world of constantly changing environments and talk a lot about climate change most of our environmental laws policies and scientific premises are based on the idea that the environment is constant never changing except when people affect it For another we have lost contact with nature in personal ways Disconnected from our surroundings we lack the deep understanding and feelings about the environment to make meaningful judgments The environment has become just another one of those special interests that interferes with our lives Poised to be a core text of the twenty first century environmental movement *The Moon in the Nautilus Shell* challenges us to think critically about our role in nature
