IFRS related teaching resources to support those courses This book was originally published as a special issue of Accounting Education An international journal

**Instructor's Manual to Accompany Weygandt Financial Accounting, IFRS, 2nd Edition** Jerry J. Weygandt, Paul D. Kimmel, Donald E. Kieso, 2012-02 *Financial Accounting and Management Control*

Fredrik Nilsson, Anna-Karin Stockenström, 2015-02-20 This book is about financial accounting and management control and how these two information systems are related as well as how their objectives conflict At the most fundamental level the objective of financial accounting is to provide owners and funders with comparable information on a company's value creation The aim of management control on the other hand is to give the board senior executives and employees unique information for strategy formulation and implementation One often mentioned negative effect is the risk of financial accounting affecting management control design and use making it less relevant for decision making at the company level The book provides an analysis of the complex relationship between financial accounting and management control The analysis is based on theoretical reasoning as well as several examples of how financial accounting standards affect not only the annual report but also the control system An interesting and perhaps unexpected conclusion is that management control seems to affect financial accounting almost as much as financial accounting affects management control These complex relationships which can influence the design and use of both financial accounting and management control are discussed in detail in this book

**Redesigning Petroleum Taxation** Emre Üşenmez, 2018-10-15 Since its inception some 40 years ago petroleum specific taxation in the UK has been subject to numerous modifications Often these modifications were brought into place not only to sufficiently incentivise the investors but also to capture a fair share for the government However it is evident from the frequency of changes that finding the right balance between these two aims is no easy matter Such a balance and the consequent fiscal stability is necessary for the long term relationship between the parties to endure to their mutual benefit Still it does not take much for one or other party to feel that they are out of balance As a consequence one

party feels that the other party is taking an undue proportion of the value generated and that they are losing out Yet achieving that balance and fiscal stability is possible To understand this possibility this book first clarifies what is meant by sufficient incentivisation and fair share before developing a new fiscal system that manages this balance and stability Such clarification yields objective criteria against which to assess not only the existing regime but also the newly proposed regime This approach is further complemented by the critical analysis of the fiscal legislative framework and the evaluation of the legal positions of specific contractual elements and mechanisms found within that framework This latter analysis is important in order to reduce the legal uncertainty such elements may create which can otherwise lead to further reactive amendments and revisions to the fiscal regime in the future

*Corporate Tax Base in the Light of the IAS/IFRS and EU Directive 2013/34: A Comparative Approach* Mario Grandinetti, 2016-06-17 The recent relaunch of the European Commission's Common Consolidated Corporate Tax Base CCCTB project promises a sorely needed leap forward in the harmonization of the rules by which companies calculate their taxable profits In particular the initiative hopes to remedy the severe barrier to cross border business caused by the the accounting Tower of Babel by which companies tax bases are determined under national law This thorough analysis and commentary covers the influence of accounting rules on tax considering both generally accepted standards international accounting standards IAS and international financial reporting standards IFRS and EU Directive 2013 34 Three introductory chapters usher in detailed comparative overviews of the effect of these rules on taxation in nine EU Member States as well as in two other major EU trading partners the United States and Brazil Fully explaining the remarkable recent improvement in the comparability of accounts that represent favourable preconditions for creating a single market for financial services within the EU this book covers every relevant detail including the following and much more criterion of evaluation of alternative fixed assets based on revaluated amounts criterion based on fair value provisions applicable to income statements notes reports and financial statements rules applicable to the publication of documents transparency in payments to governments dispositions on exemptions hierarchy of general provisions and principles balance sheet and profit and loss account simplifications for small and medium sized enterprises SMEs system of creditors protection and protection of investors interests This book is a peerless explication of the taxation choices granted to Member States under IAS IFRS and EU Directive 2013 34 and how they will be affected by ongoing Commission initiatives Because relevant timely reliable and comparable information assumes a leading role in protecting the interests of investors creditors and other stakeholders as well as in ensuring that all operators act on a level playing field under equal conditions the analysis presented here is of immeasurable value to lawyers business persons and officials concerned with taxation not only in Europe but anywhere within the reach of international trade
