

The Impact of the IOM Report on Nursing

5 pages | 1164 words

The Affordable Care Act was passed on March 23rd, 2010 and belongs to the health reform which increases advantages provided by insurance business. In Wisconsin insurer are now required to cover all preventative care, they are restricted from dropping coverage of those who are detected with costly illness, they are not able to make a yearly or lifetime limit, and quickly they will be not able to "discriminate versus anybody with a pre-existing condition" (Healthcare law, n.d., para. 1-2)." The new law also makes a considerable financial investment in State and community-based efforts that promote public health, prevent illness and protect against public health emergencies" (Health care law, n.d., para. 2). This is just a portion of the new benefits and more will come during the healthcare reform. This increase in ease of access and increase in preventative treatment and education, in addition to the aging population, is going to call for a significant increase in health care employees. In order to satisfy the near future needs, modifications need to happen in the method health care is provided. The Organization of Medicine of the National Academics composed a report, The Future of Nursing: Leading Change. Advancing Health (IOM report). This report is currently, or is going to be impacting nursing practice in general but particularly in medical care, nurse's role as a leader, nursing education, and on my goals for my future professional practice during the health reform. The IOM report "analyzes how enabling nurses to practice to the full degree of their education and training can be a major action forward in fulfilling these difficulties" (Committee on the Robert Wood Johnson Structure Effort on the Future of Nursing, at the Institute of Medicine; Institute of Medicine [IOM], 2011, p. 86). The IOM report likewise describes how health care needs to alter its focus from severe care settings to main care and preventative care. By expanding the role of nurses to use their full range of abilities, nurses can contribute to the option of a scarcity of medical care providers by finishing education, evaluations and follow up home check outs. An example of this is that a nurse can concentrate on educating clients on how to manage their persistent conditions such as diabetes and high blood pressure. The same nurse can educate the community on wellness and preventative measures for diabetes and hypertension. Nurses can coordinate the patient's care and carry out many of the duties required for their care. This decreases the amount of time required for the main provider, allowing them to see more patients. This will help increase patient satisfaction, and allow the main provider to see more patients or see those who are more critical (IOM, 2011). "If the United States is to achieve this necessary transformation of its health care system, the evidence points to the importance of relying on nurses in enhanced and reconceptualized roles" (IOM, 2011, p. 95) There are many way in which nurses could contribute leadership to improve the health care system to provide advance patient care. IOM states that, "serving as strong patient advocates, nurses must be involved in decision...
