Malcolm Sherrington,2015-07-22 Julia is a well constructed programming language with fast execution speed eliminating the classic problem of performing analysis in one language and translating it for performance into a second This book will help you develop and enhance your programming skills in Julia to solve real world automation challenges This book starts off with a refresher on installing and running Julia on different platforms Next you will compare the different ways of working with Julia and explore Julia s key features in depth by looking at design and build You will see how data works using simple statistics and analytics and discover Julia s speed its real strength which makes it particularly useful in highly intensive computing tasks and observe how Julia can cooperate with external processes in order to enhance graphics and data visualization Finally you will look into meta programming and learn how it adds great power to the language and establish networking and distributed computing with Julia **Julia: High Performance Programming** Ivo Balbaert,Avik

Sengupta,Malcolm Sherrington,2016-11-28 Leverage the power of Julia to design and develop high performing programs About This Book Get to know the best techniques to create blazingly fast programs with Julia Stand out from the crowd by developing code that runs faster than your peers code Complete an extensive data science project through the entire cycle from ETL to analytics and data visualization Who This Book Is For This learning path is for data scientists and for all those who work in technical and scientific computation projects It will be great for Julia developers who are interested in high performance technical computing This learning path assumes that you already have some basic working knowledge of Julia s syntax and high level dynamic languages such as MATLAB R Python or Ruby What You Will Learn Set up your Julia environment to achieve the highest productivity Solve your tasks in a high level dynamic language and use types for your data only when needed Apply Julia to tackle problems concurrently and in a distributed environment Get a sense of the possibilities and limitations of Julia s performance Use Julia arrays to write high performance code Build a data science project through the entire cycle of ETL analytics and data visualization Display graphics and visualizations to carry out modeling and simulation in Julia Develop your own packages and contribute to the Julia Community In Detail In this learning path you will learn to use an interesting and dynamic programming language Julia You will get a chance to tackle your numerical and data problems with Julia You ll begin the journey by setting up a running Julia platform before exploring its various built in types We ll then move on to the various functions and constructs in Julia We ll walk through the two important collection types arrays and matrices in Julia You will dive into how Julia uses type information to achieve its performance goals and how to use multiple dispatch to help the compiler emit high performance machine code You will see

how Julia's design makes code fast and you'll see its distributed computing capabilities. By the end of this learning path you will see how data works using simple statistics and analytics and you'll discover its high and dynamic performance, its real strength which makes it particularly useful in highly intensive computing tasks. This learning path combines some of the best that Packt has to offer in one complete curated package. It includes content from the following Packt products: *Getting Started with Julia* by Ivo Balvaert, *Julia High Performance* by Avik Sengupta, *Mastering Julia* by Malcolm Sherrington, *Style and approach*. This hands-on manual will give you great explanations of the important concepts related to Julia programming.
