

Introducing the Peripheral IV (PIV) Documentation Form:

Introductory statement:

Peripheral intravenous cannulation is a common procedure carried out to allow rapid and accurate administration of medication and fluid [Endscott et al, 2006]. There are risks associated with this placement, the most common being phlebitis. Phlebitis is caused by inflammation to the vein at a cannula access site with a mechanical, chemical or infective cause. Excellent technique including site and device choice and good infection control techniques are paramount in preventing this problem. (Higginson & Parny, 2011).

This paper will discuss the development of the Peripheral Intravenous Documentation form at a large District Health Board hospital providing care for a large geographical region.

Background

Two years ago I attended the IVNZ conference in Rotorua. I was particularly impressed with the presentation by Andrew Jackson on the Visual Infusion Phlebitis Scoring system (VIP) as well as the presentation on IV complications / infections. When I returned to work I set about presenting this information to the orthopaedic ward nurses. I developed a poster to challenge them regarding IV safety and saving lines – [see appendix A]. I gave education sessions on the VIP score and the risks of infection and encouraged nurses to use this as their documentation. I put up little posters on every available shelf area where IV supplies were held to encourage 15 second scrub the hub.

When seconds count – see count on your
Scrub the Hub 15 seconds – then allow to dry

The Visual Infusion Phlebitis Score (VIP) is a tool recommended by the Royal College of Nursing (and subsequently the Intravenous Nurses of NZ – IVNZ). It was first developed by Jackson in 1998. This scoring system is now widely used as a valid and reliable method of determining when an IV line should be removed (Gallant & Schultz, 2006). Cleaning with 70% Alcohol (and 2% Chlorhexidine, at WHHB) for 15 seconds using a scrubbing action has been shown to reduce bacterial contamination of the hub of the IV line. The term “scrub the hub” has been coined to remind staff to do this (Lockman et al, 2011 and Kaler, 2007).

second South Asia Edition of DeWit's Fundamental Concepts and Skills for Nursing is a uniquely featured textbook designed to make a worthy impact on its readers. The book is customised as per the revised B.Sc. Nursing curriculum prescribed by the Indian Nursing Council (INC) to meet the learning requirements of undergraduate students. Nursing professionals aspiring for higher education or career progression will also find this book useful for reference. The full colour text contains theoretical nursing concepts, step by step skills and procedures and clinical applications to build a strong foundation in the patient care experience. The underlying framework of all the chapters pivots around the nursing process and also portrays the concepts like psychosocial aspects, critical thinking, communication skills, interprofessional collaborations, patient/family education and cultural integrity. Discusses more than 80 essential skills and around 30 petite forms of skills with step by step format supported with coloured illustrations along with action rationale format. Each chapter starts with key terms, objectives and has supportive glossary. Enhanced with stimulating highpoints such as Special Clinical Cues, Cultural Considerations, Lifespan Considerations, Focused Assessment, Health Promotion, Legal/Ethical Considerations, Patient Education, QSEN Considerations, Safety Alert and Think Critically boxes. Includes nursing process framework featuring the application of the nursing process and nursing care plans reinforcing its application in the clinical setting. More than 20 Nursing Care Plans illustrating each step of the nursing process. Includes Concept Maps that help students visualise concepts addressed in the text and learn how a condition or response relating to symptoms, treatments and side effects can affect more than one body system.
