Count Me In! K-5 Judy Storeygard, 2014-09-09 Between the pressure to meet standards and the overwhelming number of different learning needs of students planning math lessons has become more complex In this Judith Storeygard provides proven approaches to understanding the behaviors of children with special needs and effectively teaching all students Using research based and field tested methodology this book's teaching strategies include differentiated instruction with an emphasis on co teaching between general educators and special educators Included are examples from teachers who have put these techniques into practice and guidelines for reproducing their successes in your classroom Key topics include Strategies for teaching students with autism ADHD and various learning disabilities Ways to develop students cognitive flexibility How to help learners plan organize and self monitor in mathematics class A new focus on mathematical strengths and learning ability rather than on deficits and labels There are numerous resources to help teachers address literacy needs but few address mathematics Count Me In will bring out the full potential in all of your students and in you as an educator

Context Cory Doctorow, 2011-10-01 One of the Web's most celebrated high tech culture mavens returns with this second collection of essays and polemics Discussing complex topics in an accessible manner Cory Doctorow's visions of a future where artists have full freedom of expression is tempered with his understanding that creators need to benefit from their own creations From extolling the Etsy makerverse to excoriating Apple for dumbing down technology while creating an information monopoly each unique piece is brief witty and at the cutting edge of tech Now a stay at home dad as well as an international activist Doctorow writes as eloquently about creating real time Internet theater with his daughter as he does while lambasting the corporations that want to profit from inherent intellectual freedoms

Intelligent Autonomous Systems 13 Emanuele Menegatti, Nathan Michael, Karsten Berns, Hiroaki Yamaguchi, 2015-09-03. This book describes the latest research accomplishments, innovations and visions in the field of robotics as presented at the 13th International Conference on Intelligent Autonomous Systems (IAS) held in Padua in July 2014 by leading researchers, engineers and practitioners from across the world. The contents amply confirm that robots, machines and systems are rapidly achieving intelligence and autonomy, mastering more and more capabilities such as mobility and manipulation, sensing and perception, reasoning and decision making. A wide range of research results and applications are covered and particular attention is paid to the emerging role of autonomous robots and intelligent systems in industrial production, which reflects their maturity and robustness. The contributions have been selected through a rigorous peer review process and contain many exciting and visionary ideas that will further galvanize the research community, spurring novel research directions. The series of biennial IAS conferences commenced in 1986 and represents a premiere event in robotics. **Business World**, 2010. Computer User's Manual Lamar University.
