Life Science Paper November 2013 Memorandum

Massimo Losa, Tom Papagiannakis

Life Science Paper November 2013 Memorandum:

Risk Regulation in the Internal Market Maria Weimer, 2019-03-13 This book offers a topical inquiry into the legal and political limits of EU regulation in the field of risk and new technologies surrounded by techno scientific complexity uncertainty and societal contestation It uses agricultural biotechnology as a paradigmatic example to illustrate the complex intertwinement between environmental public health economic and social concerns in risk regulation Weimer analyses the drawbacks of the EU approach to agricultural biotechnology showing that its reductionism i e the narrow understanding of GMO risks as well as the exclusion of broader societal concerns related to environmental and social sustainability has undermined both the legitimacy and effectiveness of EU regulation in this area Resistance to this approach however has also triggered legal innovations prompting us to re think EU internal market law including the way in which it manages the tensions between unity and diversity and between social and economic concerns This text offers fresh and original insights into how far the EU can go in harmonizing regulatory approaches to risk At the same time it proposes new ways of re thinking EU risk regulation to make it more responsive to different perspectives on risk and technology A unique feature of this book is that it contributes to various strains of scholarship including risk regulation internal market law public administration and studies of governance and regulation as well as connecting these themes to broader debates about the legitimacy of European integration and new ways of differentiated integration As a result it assists in re imagining the EU internal market and its regulation as a site of diversity

Father and Daughter Ann Oakley, 2014-10-22 Father and daughter provides an unique insider perspective on two key figures in twentieth century British social science Ann Oakley a highly respected sociologist and best selling writer draws on her own life and that of her father Richard Titmuss a well known policy analyst and defender of the welfare state to offer an absorbing view of the connections between private lives and public work Using an innovative mix of biography autobiography intellectual history archives and personal interviews some of which have not been previously available to the public she provides a compelling narrative about gender patriarchy methodology and the politics of memory and identity This fascinating analysis defies the usual social science publications to offer a truly distinctive account which will be of wide interest

EU Global Strategy and

Human Security Mary Kaldor, Iavor Rangelov, Sabine Selchow, 2018-04-17 This volume examines the EU's Global Strategy in relation to human security approaches to conflict. Contemporary conflicts are best understood as a social condition in which armed groups mobilise sectarian and fundamentalist sentiments and construct a predatory economy through which they enrich themselves at the expense of ordinary citizens. This volume provides a timely contribution to debates over the role of the EU on the global stage and its contribution to peace and security at a time when these discussions are reinvigorated by the adoption of the EU Global Strategy. It discusses the significance of the Strategic Review and the Global Strategy for the re-articulation of EU conflict prevention, crisis management, peacebuilding and development policies in the next few years. It also addresses the key issues facing EU security in the 21st century, including the conflicts in Ukraine, Libya and Syria, border security, cyber security and the role of the private security sector. The book concludes by proposing that the EU adopts a second generation human security approach to conflicts as an alternative to geopolitics or the War on Terror, taking forward the principles of human security and adapting them to 21st century realities. This book will be of interest to students of human security, European foreign and security policy, peace and conflict studies, global governance and IR in general.

Research, Quality, Competitiveness Attilio

Stajano, 2008-09-22 The European Union EU was launched as a response to the economic dominance of the United States and to a lesser degree the Soviet Union The nations of Western Europe were too small to compete against large scale and diversified economies on their own Six countries eventually expanding to 27 and counting took a series of steps toward progressively deeper integration the removal of internal tariffs the construction of a common external tariff the elimination of many but not all non tariff barriers leading to a single market and the adoption of a common currency by 15 of the member states The EU today equals and even exceeds the U S on many key indicators of performance In the process two similar but nonetheless divergent models of social and economic life stand in contrast with each other The U S is more committed to capitalism and does little to dilute its harsh edges while the nations of Europe support wider social safety nets and more active regulation of commercial activity to mute the cruel aspects of the free market Until recently the economic dynamism of the U S called into question whether the so called European social model was sustainable in an era of globalization The EU was slipping in competitiveness and was being challenged by new global power houses like China and India Although the U S economy has slowed there is little indication that European countries are capable of leveraging the situation to their advantage

New Perspectives on Russian-American Relations William Benton Whisenhunt, Norman E. Saul, 2015-08-14 New Perspectives on Russian American Relations includes eighteen articles on Russian American relations from an international roster of leading historians Covering topics such as trade diplomacy art war public opinion race culture and more the essays show how the two nations related to one another across time from their first interactions as nations in the eighteenth century to now Instead of being dominated by the narrative of the Cold War New Perspectives on Russian American Relations models the exciting new scholarship that covers more than the political and diplomatic worlds of the later twentieth century and provides scholars with a wide array of the newest research in the field

Lawfully Using Autonomous Weapon Technologies Jonathan Kwik, 2024-08-02 This monograph provides a practical and operational perspective to the question of how to lawfully employ autonomous weapon systems AWS from the point of view of the technology's end users field commanders While there is international consensus that targeting rules such as proportionality and precautions must be respected when using AWS there is legal and practical ambiguity as to how to translate this normative commitment into practice How are commanders in the field when guns are already blazing expected to exercise command and control when ordering AWS attacks and ensure that their targeting obligations remain fulfilled The book discusses how commanders can use existing targeting frameworks to ensure that their use of AWS remains in compliance with the rules governing the conduct of hostilities It invites the reader to step into the shoes of the military commander with all the operational pressure and uncertainty inherent to this position and explores amongst others How to maintain control of AWS throughout a targeting cycle How to make informed and reasoned deployment decisions by analysing information related to the technical

parameters of the AWS the characteristics of the operational environment and enemy countermeasures Under which circumstances AWS may not be used under targeting rules such as indiscriminate attack proportionality and the duty to cancel suspend What extra precautionary measures unique to AWS technology can and should be employed When it is militarily desirable to employ AWS over other alternatives and Under what circumstances criminal liability may be attributed for AWS related harm It offers both academic and practical outputs new legal and doctrinal insights on the technology that is useful for future legal developments and workable recommendations and efficient flowcharts that can be adopted by commanders military organisations or policymakers to ensure IHL compliant deployment of AWS Dr Jonathan Kwik is a researcher at the T M C Asser Institute in The Hague specialised in artificial intelligence and targeting law and is a member of the Board of Experts of the Asia Pacific Journal of International Humanitarian Law
