Internet of Things and the Law Guido Noto La Diega, 2022-10-14 Internet of Things and the Law Legal Strategies for Consumer Centric Smart Technologies is the most comprehensive and up to date analysis of the legal issues in the Internet of Things IoT For decades the decreasing importance of tangible wealth and power and the increasing significance of their disembodied counterparts has been the subject of much legal research For some time now legal scholars have grappled with how laws drafted for tangible property and predigital offline technologies can cope with dematerialisation digitalisation and the internet As dematerialisation continues this book aims to illuminate the opposite movement rematerialisation namely the return of data knowledge and power within a physical smart world This development frames the book's central question can the law steer rematerialisation in a human centric and socially just direction To answer it the book focuses on the IoT the sociotechnological phenomenon that is primarily responsible for this shift After a thorough analysis of how existing laws can be interpreted to empower IoT end users Noto La Diega leaves us with the fundamental question of what happens when the law fails us and concludes with a call for collective resistance against smart capitalism The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution CC BY 4.0 license

Producing and Analyzing Macro-Connectomes: Current State and Challenges Mihail Bota, Sharon Crook, Marcus Kaiser, 2016-10-20 Construction of comprehensive and detailed brain regions neuroanatomical connections matrices macro connectomes is

necessary to understand how the nervous system is organized and to elucidate how its different parts interact Macro connectomes also are the structural foundation of any finer granularity approaches at the neuron classes and types meso connectomes or individual neuron micro connectomes levels The advent of novel neuroanatomical methods as well as combinations of classic techniques form the basis of several large scale projects with the ultimate goal of producing publicly available connectomes at different levels A parallel approach that of systematic and comprehensive collation of connectivity data from the published literature and from publicly accessible neuroinformatics platforms has produced macro connectomes of different parts of the central nervous system CNS in several mammalian species The emergence of these public platforms that allow for the manipulation of rich connectivity data sets and enable the construction of CNS macro connectomes in different species may have significant and long lasting implications Moreover when these efforts are leveraged by novel statistical methods they may influence our way of thinking about the brain Hence the present brain region centric paradigm may be challenged by a network centric one Ultimately these projects will provide the information and knowledge for understanding how different neuronal parts communicate and function developing novel approaches to diseases and disorders and facilitating translational efforts in neurosciences With this Research Topic we bring together the current state of macro connectome related projects including the large scale production of thousands of publicly available neuronatomical experiments databases with tens of thousands of connectivity records collated from the published literature and the newest methods for displaying and analyzing this information This topic also includes a wide range of challenges and how they are addressed from platforms designed to integrate connectivity data across different sources species and CNS levels of organization to languages specifically designed to use these data in models at different scales of resolution to efforts of 3D reconstruction and data integration and to approaches for extraction and representation of this knowledge Finally we address the present state of different efforts of meso connectomes construction and of computational modeling in the context of the information provided by macro connectomes

Fishing, Foraging and Farming in the Bolivian Amazon Lisa Ringhofer, 2009-12-01 Empirical in character this book analyses the society nature interaction of the Tsimane a rural indigenous community in the Bolivian Amazon Following a common methodological framework the material and energy flow MEFA approach it gives a detailed account of the biophysical exchange relations the community entertains with its natural environment the socio economic use of energy materials land and time Equally so the book provides a deeper insight into the local base of sociometabolic transition

processes and their inherent dynamics of change The local community described in this publication stands for the many thousands of rural systems in developing countries that in light of an ever more globalising world are currently steering a similar but maybe differently paced development course This book presents insightful methodological and conceptual advances in the field of sustainability science and provides a vital reader for students and researchers of human ecology ecological anthropology and environmental sociology It equally contributes to improving professional development work methods

Google, Amazon, and Beyond: Creating and Consuming Web Services Alexander Nakhimovsky, Tom Myers, 2008-01-01 What Is This Book About This is a book about Web Services Web Services are still more like a movement than a mature technology The movement is motivated by a vision of a semi auto mated Web that can support long chains of interactions between autonomous agents There are three important components to that vision One is interoperability a service can have clients agents from any platform in any language Another is autonomy an agent can discover the services it needs from their published descriptions that include both what the service can do and how it does it the interfaces of available actions The third is semi automatic code creation one description can be used by a development framework to automate the creation of code for clients and by the services themselves As of today interoperability is close to full realization with only occasional glitches autonomy is a distant vision but it still has problems Interoperability has been achieved code creation is useful in part by using an XML based high level protocol SOAP for message exchanges between clients and services As long as the client can produce messages in the right format it doesn't matter what language they're written in or on what platform they run The first three chapters of our book show how to write platform independent Web Services clients in Javascript and Java running from within a browser IE6 or Mozilla

Sediments and Water Interactions Peter G. Sly, 2012-12-06 The first symposium on sediment freshwater interactions was held in Amsterdam in 1976 and the second was held at Kingston Ontario Canada in 1981 The third symposium was held at the University of Geneva in 1984 and also included a number of contributions dealing with sediment saltwater interactions It is expected that future symposia of this series will retain this approach and that the revised symposium title will remain the same for later proceedings of these meetings Because of the large number of submissions in 1984 many were given as poster presentations Extended abstracts of all contributions to the Geneva symposium appear in *Interactions Between Sediments and Water* C E P Consultants Ltd 26 Albany St Edinburgh EH1 3QH U K 1984 Full length papers appear only in the proceedings The format of the third symposium was similar to its predecessors The location provided a particularly good opportunity for attendance by European scientists who represented about 81% of the participants About 16% came from North America and 3% were from Southeast Asia and Australia It is unfortunate that there were no contributors from either Africa or South America or other parts of Asia In all 16 countries were represented at this symposium In a continuing attempt to provide equal opportunities for attendance by scientists from other parts of the world it is planned to hold the next symposium in Australia in 1987 Further information

Insects and Sustainability of Ecosystem Services Timothy D. Schowalter, 2013-05-23 With few exceptions insects are perceived in industrialized countries as undesirable pests In reality relatively few insects interfere with us or our resources Most have benign or positive effects on ecosystem services and many represent useful resources in non industrialized countries Challenging traditional perceptions of the value of insects Insects and Sustainability of Ecosystem Services explores the ways insects affect the ecosystem services we depend upon It also fosters an appreciation for the amazing diversity adaptive ability and natural roles of insects The book discusses how the ways in which we manage insects will determine an ecosystem s capacity to continue to supply services It reviews aspects of insect physiology behavior and ecology that affect their interactions with other ecosystem components and ecosystem services emphasizing critical effects of insects on the sustainability of ecosystem processes and services The author examines the integration of insect ecology with self regulatory aspects of ecosystems that control primary production energy and nutrient fluxes and global climate functions that underlie the sustainability of ecosystem services Clearly we need environmental policies that meet needs for pest control where warranted but do not undermine the important contributions of insects to sustaining ecosystem processes and services With in depth coverage of the multiple often compensatory effects of insects on various resources or ecosystem services and on the consequences of control tactics for those resources or services Insects and Sustainability of Ecosystem Services

recommends changes in perspectives and policies regarding insects that will contribute to sustainability of ecosystem services

1493 Charles C. Mann, 2011 More than 200 million years ago geological forces split apart the continents Isolated from each other the two halves of the world developed totally different suites of plants and animals Columbus's voyages brought them back together and marked the beginning of an extraordinary exchange of flora and fauna between Eurasia and the Americas

Fertilizer Abstracts, 1977 *Microbial Interactions in Agriculture and Forestry* Nanjappa Shamanna Subba Rao, Yvon R. Dommergues, 2000 Molecular microbiological studies have focused attention on the characterization of known and unknown bacterial species implicated in plant growth This text explores the microbial interactions relevant in agriculture and forestry

Literature Juan R. Duchesne Winter, 2019-07-09 This book discusses new developments of plant studies and plant theory in the humanities and compares them to the exceptionally robust knowledge about plant life in indigenous traditions practiced to this day in the Amazonian region Amazonian thinking in dialogue with the thought of Eduardo Viveiros de Castro Emanuele Coccia and others can serve to bring plant theory in the humanities beyond its current focus on how the organic existence of plants is projected into culture Contemporary Amazonian indigenous literature takes us beyond conventional theory and into the unsuspected reaches of vegetal networks It shows that what matters about plants are not just their strictly biological and ecological projections but the manner in which they interact with multiple species and cultural actors in continuously shifting bodies and points of view by becoming other and fashioning a natural and social diplomacy in which humans participate along with non humans **Roy Reuther and the UAW** Alan Reuther, 2025-04-01 This biography of Roy

Reuther examines his tumultuous life including the triumphs and tragedies in the labor and civil rights movements It also serves as a cautionary tale about the dangers activists may face as they confront entrenched societal powers As the brother of famed labor leader Walter Reuther Roy was a key figure in the historic Flint sit down strike that gave birth to the United

Auto Workers UAW He became the political director of the UAW and was deeply involved in struggles to pass civil rights legislation This book explores his passion for increasing voter participation and his vow to help downtrodden farmworkers Many of the injustices that Reuther fought continue to plague America today This book provides important context for the current efforts of workers to organize for the Black Lives Matter movement and for efforts to reform the filibuster rule and stop voter suppression It shows how dedicated individuals can overcome enormous odds to win great victories for social justice and emphasizes the potential connections between the labor and civil rights movements offering hope for a more just future
