Paper 02 – General Proficiency

2 hours 40 minutes

22 MAY 2013 (a.m.)

1. Number

a. --

i. $\frac{11}{18}$

ii. 1.3524

b. The better buy is decided on how much are you getting per dollar spent.

More is better. So we compare both $\frac{350\text{ml}}{\$4.2} = 83.3\text{ml} / \$$ and $\frac{450\text{ml}}{\$5.13} = 87.72\text{ml} / \$$, we see that buying the 450ml is better

c. --

i. \$768 interest in the first year

ii. \$6000 remains to be paid

iii. \$480 interest in the second year calculated on the reducing balance

2. Algebra

a. Factorize completely

i. $2x^3 - 8x = 2x(x-2)(x+2)$

ii. $3x^2 - 5x - 2 = (3x+1)(x-2)$

b. --

i. $F = \frac{9}{5}C + 32 \Rightarrow C = \frac{5}{9}(F - 32)$

ii. $C = \frac{5}{9}(113 - 32) = 45^\circ C$

c. --

i. .

a. $10(500 - x)$

[The Life and Death of Secondary Education for All](#) Richard Pring, 2013-05-07 Is there life after death for secondary education This book focuses upon the quality of learning Reform so called too often begins with qualifications examinations institutional provision paths of progression All those are very important but their value lies in the support they give to learners and their learning in its different forms One needs to start with the aims of education and then with what it means to learn practically theoretically morally and with the very many different needs of the learners That is what this book aims to do In so doing it will be both

philosophical in analysis and empirical in example So much is happening from down below that goes unrecognised by policy makers But innovations too often get hampered by government interventions by a bureaucratic mentality and by failure to spread good practice The general argument of the book therefore will be illustrated throughout with detailed references to practical developments in schools colleges the third sector youth work independent training providers and professional bodies across several countries The book builds on Education for All which was based on 14 19 research into secondary education this book transcends the particularities of England and Wales and digs more deeply into those issues which are at the heart of educational controversy policy and practices and which survive the transience of political change and controversy The issues the aims of education standards of performance the consequent vision of learning the role of teachers progression from school to higher or further education and into employment the provision of such education and training and the control of education are by no means confined to the UK or to this day and age Pring identifies similar problems in other countries such as the USA Germany and France and indeed in the Greece of Plato and Aristotle and offers solutions with a comparative perspective It is a critical time Old patterns of education and its provision are less and less suitable for facing the twenty first century The patterns and modes of communication have changed radically in a few years and those changes are quickening in pace The economic context has been transformed affecting the skills and knowledge needed for employment The social world of young people raises fresh demands hopes and fears A global recession has affected young people disproportionately making quality of life and self fulfilment ever more difficult to attain In addressing learning and the learners first and foremost the book will argue for a wider vision of learning and a more varied pattern of provision Old structures must give way to new

Teaching Secondary Geography as if the Planet Matters John Morgan, 2013-10-08 Teaching Geography as if the Planet Matters provides a timely outline of powerful knowledge and arguments that will be needed to counter a strengthening of current curriculum orthodoxies Not until school geography undergoes the revolution that this book outlines can it honestly claim to be contributing to more sustainable futures John Huckle Visiting Fellow at the University of York and was formerly Principal Lecturer in Education at De Montfort University We are surrounded by images and warnings of impending environmental disaster Climate change famine population growth and urban crisis coupled with more recent

financial chaos all threaten our sense of what it will be like to live in the future This thought provoking text looks at how Geography teachers can develop approaches to curriculum and learning which help students understand the nature of the contemporary world It sets out a model for teaching and learning that allows teachers to examine existing approaches to teaching and draw upon the insights of geography as a discipline to deepen students understanding of urban futures climate change geographies of food and the geographies of the credit crunch Features include examples of suggested teaching activities questions and activities for further study detailed case studies sources of further reading and information The true worth of a school subject is revealed in how far it can account for and respond to the major issues of the time The issue of the environment cuts across subject boundaries and requires an interdisciplinary response Geography teachers are part of that response and they have a crucial role in helping students to respond to environmental issues and representations

Teaching and Using ICT in Secondary Schools Terry Russell,2013-12-16 The coverage of this book will provide an ideal text for use during departmental meetings for all curriculum subjects where ICT is an issue It can also be used as a reference text for school based mentors taking part in the teacher training process As well as discussing the effective teaching of ICT as a curriculum subject the author uses sample case studies to illustrate the wider role at Key Stages 3 and 4 for GCSE and for post 16 in the form of VCE He also advises on the teacher training process the primary secondary transfer issues related to interface design hardware and software provision and the assessment recording and reporting of ICT capability This book will appeal to a wide range of target readerships trainees taking PGCE courses to become specialist ICT teachers as well as other PGCE trainees as they all have to meet statutory ICT standards practicing secondary teachers whether specialists in ICT or other subjects who need to use ICT in their teaching and secondary mentors with ICT as a major part of their responsibility
