The Role of Phytoconstituents in Health Care Megh R. Goyal, Hafiz Ansar Rasul Suleria, Ramasamy

Harikrishnan, 2020-02-04 This informative volume provides new insights with scientific evidence on the uses of medicinal plants in the treatment of certain diseases It reviews various therapies with herbal phytoconstituents for certain types of disorders modes of action and pharmacological screening It focuses on potential benefits of herbal extracts and bioactive compounds for human health care provides a comparative phytoconstituent analysis of selected medicinal plants using GCMS FTIR techniques and discusses the role of herbal medicines in female genital infections It goes on to look at the health boosting properties of cabbage and the functional properties of milk yam *Ipomoea digitata* L [Feminist Technoecologies](#)

Dagmar Lorenz-Meyer, Pat Treusch, Xin Liu, 2020-06-29 This book develops the concept of feminist technoecologies as a theoretical and methodological tool for examining the co constitutive relation between technology and ecology which have typically been considered as distinct objects of studies In underscoring how their dynamic relationality troubles the location of agency this book challenges the idea that technology as the marker of the innovative capacity of the human either corrupts or saves ecology The contributions to the volume present feminist approaches that contextualise and historicize such issues as multi species survival border control regimes solar power bioart artificial intelligence and air pollution They insist on the centrality of corporeality affects ethics and vulnerability in the materialisation of technoecological relations and call into question the exceptional status of the figure of hu Man Together they offer critical and creative tools or modes of inquiry for imagining alternative modalities of practicing care and thinking environmental sustainability As a creative contribution to the growing literature on new configurations of bodies technologies and environments against the backdrop of ecological degradation digital technologization and precarity in late capitalism *Feminist Technoecologies* extends the interchanges between feminist materialisms environmental humanities and feminist technosciences studies and will be a resource for all those interested in these fields This book was originally published as a special issue of *Australian Feminist Studies*

Human Growth and Nutrition in Latin American and Caribbean Countries Sudip Datta Banik, 2023-07-20

This book analyzes biological and sociocultural factors that influence nutritional status physical growth development and maturation of children and adolescents in Latin American and Caribbean LAC countries in the perspective of human ecology Chapters in this book bring together both theoretical and empirical studies that take into account human biological and environmental conditions to understand how ethnic diversity culturally determined lifestyle and dietary habits influence biological variation of human growth and nutrition in nine LAC countries Argentina Brazil Chile Cuba Dominican Republic El Salvador Guatemala Mexico and Peru The book is divided into three sections Chapters in the first section analyze nutritional and epidemiological aspects of child growth in the region Articles in the second section focus on methods to evaluate human growth development and maturation Finally the third section brings together a series of studies representing different LAC

countries analyzing biocultural impacts on child growth and nutrition By bringing together studies about the relationship between human biology cultural diversity nutrition and health in a region with huge environmental challenges this volume addresses many of the challenges to achieve the United Nations Sustainable Development Goals 2 Zero Hunger and 3 Good Health and Well Being Chapters in this volume present and discuss data on the effects of malnutrition on children's and adolescent's health and development such as chronic undernutrition or stunting growth deficit and excess weight overweight and obesity as the risk factors for child morbidity and mortality due to non communicable diseases Human Growth and Nutrition in Latin American and Caribbean Countries will be a valuable resource for both students and researchers in different disciplines dedicated to the interdisciplinary research on the intersection between human biology cultural diversity nutrition and health It will also be a useful source of information for both health professionals and policy makers developing and implementing interventions and public policies to achieve UN's SDGs 2 and 3 particularly in the LAC regions

The Genera of Lactic Acid Bacteria W.H.N Holzapfel, B.J. Wood, 2012-12-06 The Lactic Acid Bacteria is planned as a series in a number of volumes and the interest shown in it appears to justify a cautious optimism that a series comprising at least five volumes will appear in the fullness of time This being so I feel that it is desirable to introduce the series by providing a little of the history of the events which culminated in the decision to produce such a series I also wish to indicate the boundaries of the group The Lactic Acid Bacteria as I have defined them for the present purposes and to outline my hopes for future topics in the series Historical background

lowe my interest in the lactic acid bacteria LAB to the late Dr Cyril Rainbow who introduced me to their fascinating world when he offered me a place with him to work for a PhD on the carbohydrate metabolism of some lactic rods isolated from English beer breweries by himself and others notably Dr Dora Kulka He was particularly interested in their preference for maltose over glucose as a source of carbohydrate for growth expressed in most cases as a more rapid growth on the disaccharide but one isolate would grow only on maltose Eventually we showed that maltose was being utilised by direct fermentation as the older texts called it specifically by the phosphorolysis which had first been demonstrated for maltose by Doudoroff and his associates in their work on maltose metabolism by a strain of *Neisseria meningitidis*

Sustainability Challenges in the Agrofood Sector Rajeev Bhat, 2017-02-16 Sustainability Challenges in the Agrofood Sector covers a wide range of agrofood related concerns including urban and rural agriculture and livelihoods water energy management food and environmental policies diet and human health Significant and relevant research topics highlighting the most recent updates will be covered with contributions from leading experts currently based in academia government bodies and NGOs see list of contributors below

Chapters will address the realities of sustainable agrofood the issues and challenges at stake and will propose and discuss novel approaches to these issues This book will be the most up to date and complete work yet published on the topic with new and hot topics covered as well as the core aspects and challenges of agrofood sustainability Improving Food Safety Through a One Health Approach Institute of Medicine, Board on Global Health, Forum on Microbial Threats, 2012-10-10

Globalization of the food supply has created conditions favorable for the emergence reemergence and spread of food borne pathogens compounding the challenge of anticipating detecting and effectively responding to food borne threats to health In the United States food borne agents affect 1 out of 6 individuals and cause approximately 48 million illnesses 128 000 hospitalizations and 3 000 deaths each year This figure likely represents just the tip of the iceberg because it fails to account for the broad array of food borne illnesses or for their wide ranging repercussions for consumers government and the food industry both domestically and internationally A One Health approach to food safety may hold the promise of harnessing and integrating the expertise and resources from across the spectrum of multiple health domains including the human and veterinary medical and plant pathology communities with those of the wildlife and aquatic health and ecology communities The IOM's Forum on Microbial Threats hosted a public workshop on December 13 and 14 2011 that examined issues critical to the protection of the nation's food supply The workshop explored existing knowledge and unanswered questions on the nature and extent of food borne threats to health Participants discussed the globalization of the U S food supply and the burden of illness associated with foodborne threats to health considered the spectrum of food borne threats as well as illustrative case studies reviewed existing research policies and practices to prevent and mitigate foodborne threats and identified opportunities to reduce future threats to the nation's food supply through the use of a One Health approach to food safety Improving Food Safety Through a One Health Approach Workshop Summary covers the events of the workshop and explains the recommendations for future related workshops Global Soil Biodiversity Atlas European Commission. Joint Research Centre, 2016 The Atlas describes soil as habitat for the diversity of organisms that live under our feet At the same time it draws attention to the threats to soil biodiversity such as invasive species pollution intensive land use practices or climate change The Atlas provides current solutions for a sustainable management of soils It was coordinated by the JRC and the Global Soil Biodiversity Initiative www.globalsoilbiodiversity.org with more than 70 contributing organisations and several hundred individual contributions It illustrates the diversity of soil organisms explains their geographical and temporal distribution the ecosystem functions and services provided by soil biota Most importantly it draws attention to the myriad of threats to soil biodiversity These include inappropriate land management practices e g deforestation land take for infrastructure development agricultural systems over grazing forest fires and poor water management both irrigation and drainage Other practices such as land conversion from grassland or forest to cropped land result in rapid loss of soil carbon which indirectly enhances global warming The Atlas shows that mismanaging soils could exacerbate the effects of climate

change jeopardise agricultural production compromise the quality of ground water and worsen pollution It also proposes solutions to safeguard soil biodiversity through the development of policies that directly or indirectly target soil health leading to a more sustainable use [National Library of Medicine Current Catalog](#) National Library of Medicine (U.S.),1987

Centralizing Fieldwork Jeremy MacClancy, Agustín Fuentes, 2010-12-01 Fieldwork is a central method of research throughout anthropology a much valued much vaunted mode of generating information But its nature and process have been seriously understudied in biological anthropology and primatology This book is the first ever comparative investigation across primatology biological anthropology and social anthropology to look critically at this key research practice It is also an innovative way to further the comparative project within a broadly conceived anthropology because it does not focus on common theory but on a common method The questions asked by contributors are what in the pursuit of fieldwork is common to all three disciplines what is unique to each how much is contingent how much necessary Can we generate well grounded cross disciplinary generalizations about this mutual research method and are there any telling differences Co edited by a social anthropologist and a primatologist the book includes a list of distinguished and well established contributors from primatology and biological anthropology

Anthropogenic Effects on the Microbial Communities of Terrestrial Ecosystems Xingjia Xiang, Jianming Wang, Mark Radosevich, Yaping Lin, Wenchen Song, 2025-08-29 Microorganisms are important participants in supporting the functionality and diversity of terrestrial ecosystems The microbial community is a key component that determines the structure function and complex processes of terrestrial ecosystems The patterns and mechanisms of microbial community structure and function with respect to geographical scales and environmental changes have always been a focal and hot topic in environmental microbiology ecology and geography research However with the intensification of climate change and changes caused by other human activities the ability of terrestrial ecosystems to withstand disturbances and maintain their functionality is increasingly being put to the test The role and changes of terrestrial ecosystem microorganisms in addressing this issue have become a global focus and challenge for research **Forthcoming Books** Rose Arny, 2003 *Climate Change 2022 – Impacts, Adaptation and Vulnerability* Intergovernmental Panel on Climate Change (IPCC), 2023-06-22 The Working Group II contribution to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change IPCC provides a comprehensive assessment of the scientific literature relevant to climate change impacts adaptation and vulnerability The report recognizes the interactions of climate ecosystems and biodiversity and human societies and integrates across the natural ecological social and economic sciences It emphasizes how efforts in adaptation and in reducing greenhouse gas emissions can come together in a process called climate resilient development which enables a liveable future for biodiversity and humankind The IPCC is the leading body for assessing climate change science IPCC reports are produced in comprehensive objective and transparent ways ensuring they reflect the full range of views in the scientific

Parasite Infections: From Experimental Models to Natural Systems Toni Aebischer,Kai Matuschewski,Susanne Hartmann,2018-07-06 Eukaryotic parasites including parasitic protozoans worms and arthropods are more complex and heterogeneous organisms than pathogenic bacteria and viruses This notion implies different evolutionary strategies of host exploitation Typically parasites establish long term infections and induce relatively little mortality as they often limit pathological changes by modulating host cells and downregulating adverse immune responses Their pattern of distribution tends to be endemic rather than epidemic Despite these seemingly benign traits parasites usually cause substantial chronic morbidity thus constituting an enormous socioeconomic burden in humans particularly in resource poor countries and in livestock worldwide Parasite induced fitness costs are an evolutionary force that can shape populations and contribute to species diversity Therefore a thorough understanding of parasites and parasitic diseases requires detailed knowledge of the respective biochemical molecular and immunological aspects as well as of population genetics epidemiology and ecology This Research Topic RT bridges disciplines to connect molecular immunological and wildlife aspects of parasitic infections The RT puts emphases on four groups of parasites Plasmodium Toxoplasma Giardia and intestinal helminths Co infections are also covered by the RT as they represent the most common form of parasite infections in wildlife and domestic animal populations Within the four types of parasites the following topics are addressed 1 Experimental models hypothesis testing translation and limits 2 Critical appraisal of experimental models 3 Natural systems Technological advances for investigations in natural parasite host systems and studies in natural systems 4 The urgent need for better models and methods in natural parasite systems Hence the RT covers and illustrate by the means of four main parasitic infections the parasite host system at the molecular cellular and organismic level [Handbook of Metal-Microbe Interactions and Bioremediation](#) Surajit Das,Hirak Ranjan Dash,2017-04-07 Around the World metal pollution is a major problem Conventional practices of toxic metal removal can be ineffective and or expensive delaying and exacerbating the crisis Those communities dealing with contamination must be aware of the fundamentals advances of microbe mediated metal removal practices because these methods can be easily used and require less remedial intervention This book describes innovations and efficient applications for metal bioremediation for environments polluted by metal contaminates
