**Virtue Epistemology Naturalized** Abrol Fairweather, 2014-05-27 This book presents four bridges connecting work in virtue epistemology and work in philosophy of science broadly construed that may serve as catalysts for the further development of naturalized virtue epistemology These bridges are empirically informed theories of epistemic virtue virtue theoretic solutions to under determination epistemic virtues in the history of science and the value of understanding Virtue epistemology has opened many new areas of inquiry in contemporary epistemology including epistemic agency the role of motivations and emotions in epistemology the nature of abilities skills and competences wisdom and curiosity Value driven epistemic inquiry has become quite complex and there is a need for a responsible and rigorous process of constructing naturalized theories of epistemic virtue This volume makes the involvement of the sciences more explicit and looks at the empirical aspect of virtue epistemology Concerns about virtue epistemology are considered in the essays contained here including the question can any virtue epistemology meet both the normativity constraint and the empirical constraint The

volume suggests that these worries should not be seen as impediments but rather as useful constraints and desiderata to guide the construction of naturalized theories of epistemic virtue

*Taxation History, Theory, Law and Administration* Parthasarathi Shome, 2021-04-09 Tax practitioners are unfamiliar with tax theory. Tax economists remain unfamiliar with tax law and tax administration. Most textbooks relate mainly to the US, UK, or European experiences. Students in emerging economies remain unfamiliar with their own taxation history. This textbook fills those gaps. It covers the concept of taxes in regards to their rationale, principles, design, and common errors. It addresses distortions in consumer choices and production decisions caused by tax and redressals. The main principles of taxation: efficiency, equity, stabilization, revenue, productivity, administrative feasibility, international neutrality, are presented and discussed. The efficiency principle requires the minimisation of distortions in the market caused by tax. Equity in taxation is another principle that is maintained through progressivity in the tax structure. Similarly, other principles have their own ramifications that are also addressed. A country's constitutional specification of tax assignment to different levels of government: central, state, municipal, are elaborated. The UK is more centralised than the US and India. India has amended its constitution to introduce a goods and services tax (GST) covering both central and state governments. Drafting of tax law is crucial for clarity and this aspect is addressed. Furthermore, the author illustrates different types of taxes such as individual income tax, corporate income tax, wealth tax, retail sales, value added goods and services tax, selective excises, property tax, minimum taxes such as the minimum alternate tax (MAT), cash flow tax, financial transactions tax, fringe benefits tax, customs duties and export taxes, environment tax, and global carbon tax and user charges. An emerging concern regarding the inadequacy of international taxation of multinational corporations is covered in some detail. Structural aspects of tax administration are given particular attention.
