A mixture

A _____ is a combination of two or more substances in which the substances don't form _____ bonds with each other.

There are many kinds of mixtures. Some mixtures are chunky like a mixture of peanuts and raisins. These mixtures are called _____ mixtures.

Some mixtures with large particles separate by themselves over time.

_____ water for example will become clear as the mud _____ to the bottom. These mixtures are called _____. The particles in a suspension are often big enough to be seen with the naked eye and can block out light.

Another kind of mixture called a _____ has particles small enough that the particles don't settle, yet large enough that they can still block out _____. Smoke and _____ are examples of colloids.

Sugar water is a different kind of mixture called a _____. In solutions, the particles are so small that they don't block light or settle to the bottom. The substances mix uniformly so that the mixture looks the same everywhere, even under a _____. Mixtures that are uniform everywhere are called _____ mixtures.
