Industrielle Vidler writes in his introduction In the following essays I have interrogated the struggle for an urban architecture in the modern period its critiques and aspirations in the belief that understanding the historical dimensions of the debate will lead to a renewal of interest in an architecture calculated to redeem if only partially our planet of slums and its deteriorating environment an interest that will not simply reject utopia out of hand or fall back into the complacencies of nostalgia Written during a period in which the debates themselves were actively engaged by critics and supporters of modernism they reflect contemporary issues as they search for their prehistory As historical inquiries they inevitably also engage the

**The Barcelona Pavilion by Mies van der Rohe** Dietrich Neumann,2020-12-07 While Mies van der Rohe s pavilion at the International Exposition in Barcelona in 1929 went unnoticed by most of the visitors to the fairgrounds contemporary critics enthusiastically hailed it as the most convincing statement of the Modern Age This book presents 100 selected texts about this much discussed building written then and now from the opening speech by the Spanish king to newspaper articles and private letters voices of contemporary architects architecture critics and historians and even a text by artist Ai Weiwei who created an installation in the outdoor area of the pavilion in 2010 Thus the history of this building s reception depicts a dazzling picture and inconceivable breadth including statements by such eminent authors as Frank Lloyd Wright Leonardo Benevolo Rem Koolhaas Peter Eisenman

**A Critical History of Contemporary Architecture** Dr Elie G Haddad,Asst Prof

David Rifkind,Ms Sarah Deyong,2014-03-28 This book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 The first section provides a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects

*An Accidental Masterpiece* Dietrich Neumann,2020-12-07 The Complex History of a Building With the temporary exhibition pavilion of the German Reich at the 1929 International Exposition in Barcelona Mies van der Rohe designed an architectural icon but also a controversial monument of the way the Weimar Republic portrayed itself The building is one of the most unusual success stories in the history of architecture Despite its short existence its reputation grew steadily in the following decades thanks in part to magnificent photographs It was soon considered the constructed manifesto of the Modern Age and its spatial and ideational ambitions were called a milestone of Modern architecture This comprehensively broadly researched book portrays the building's complex history and its political entanglement up to and including its reconstruction according to van der Rohe's plans at the original site between 1983 and 1986 Presumably the most important and influential architectural icon of the 20th century uniquely documented and depicted On the occasion of the 50th anniversary of Mies' death and the Bauhaus centenary Many never before published photographs from archives in the US Germany and Spain

*The New Conservatism* Jürgen Habermas, 2015-10-07 Jürgen Habermas is well known for his scholarly writings on the theoretical foundations of the human sciences The New Conservatism brings to light another side of Habermas's work showing him to be an incisive commentator on a wide range of contemporary themes The 1980s have been a crucial decade in the political life of Western democracies in general and of the Federal Republic of Germany in particular The transformations that accompanied a shift from 13 years of Social democratic rule in Germany to government by the conservative Christian Democrats are captured in this series of insightful often passionate political and cultural commentaries The central theme uniting the essays is the German problem of coming to terms within the past a problem that has important implications outside Germany as well Of particular note are the essays on what has come to be known as the Historian's Debate Habermas's attack on the revisionist German historians who have been trying to trivialize and normalize the history of the Nazi period and his defence of the need for a realistic and discriminating approach to the Nazi period and its legacy Habermas also takes up the recent debate concerning Martin Heidegger's involvement with Nazism and the rise of the neoconservative movement in Europe and America In particular the essay on The New Obscurity combines Habermas's analysis of the problems of the welfare state with his suggestions for avenues open to utopian impulses today

Hut Pavilion Shrine: Architectural Archetypes in Mid-Century Modernism Miles David Samson, 2016-03-09 The phase of American architectural history we call mid century modernism 1940 1980 saw the spread of Modern Movement tenets of functionalism social service and anonymity into mainstream practice It also saw the spread of their seeming opposites Temples arcades domes and other traditional types occur in both modernist and traditionalist forms from the 1950s to the 1970s Hut Pavilion Shrine examines this crossroads of modernism and the archetypal and critiques its buildings and theory The book centers on one particularly important and omnipresent type the pavilion a type which was the basis of major work by Louis I Kahn Paul Rudolph Philip Johnson Minoru Yamasaki and other eminent architects While focusing primarily on the architecture culture of the United States it also includes the work of British European Team X and Scandinavian designers and writers Making connections between formal analysis historical context and theory the book continues lines of inquiry which have been pursued by Neil Levine and Anthony Vidler on representation and by Sarah Goldhagen and Alice Friedman on modernism's forbidden elements of the honorific and the visually pleasurable It highlights the significance of pavilionizing mid century designers such as Victor Lundy John Johansen Eero Saarinen and Edward Durell Stone and shows how frequently essentialist and traditionalist types appeared in the roadside vernacular of drive in restaurants gas stations furniture and car showrooms branch banks and motels The book ties together the threads in mid century architectural theory

that addressed aspects of type essential structure and primal humanistic aspects of environment making and discusses how these concerns outlived the mid century moment and in the designs and writings of Aldo Rossi and others they paved the way for Post Modernism

*Innovators* David W. Galenson, 2025-01-21 Some innovators are luminous shooting stars think Pablo Picasso Albert Einstein Sylvia Plath Bob Dylan Steve Jobs who make bold leaps early and suddenly then lose their creativity Others are late bloomers Paul Cezanne Charles Darwin Virginia Woolf Alfred Hitchcock Warren Buffett who show little early promise but spend long periods doggedly pursuing distant goals and attain greatness in old age By analyzing the careers of scores of great innovators this book reveals systematic differences in the motivations and

methods of these two types and their very different patterns of creativity over the life cycle. The result is a new and deeper unified understanding of the sources of human creativity.
