cutting edge methods Prepared by leading international experts in the relevant fields *Modern Science* Sam S. Blanc,1963

The Realities of Reality - Part II: Making Sense of Why Modern Science Advances (Volume 1) Fritz Dufour, MBA, DESS,2018-09-19 This Volume 1 of Part II considers the factors that make science progress It lays out the differences between normal science and pseudoscience by showing the importance of the scientific method in the advancement of science It introduces the concept of Truth in science by raising the point that even though truth is based on the scientific method can science be true Can it depict reality The author focuses on modern science which he thinks was born thanks to the Scientific Revolution which started with Galileo Galilei and led to the Industrial Revolution The impacts of the latter is analyzed in light modernism modernization and modernity all three linked to scientific progress The book also talks about the Newtonian scientific leap by analyzing particularly the then social and political fabrics of England and Albert Einstein by showing how he changed history According to the author our very physical world can help us understand scientific progress So he explains among other things the structure of atoms and molecules the role of physics in the understanding of our universe Quantum Mechanics and the importance of Higgs Boson On the other hand the book is a stunning revelation of how important information is to scientific progress To make his point the author first talks about John Vincent Atanasoff as the Father of computer thanks to the invention of his ABC computer and then Alan Turing as the Father of modern computer thanks to his Turing Test and his views on Artificial Intelligence Both men played a momentous role in the Digital Revolution and in the Information Age according to the book Finally the author talks about nanotechnology which explores the world of small meaning at the atomic and the molecular levels and is an inescapable tool in the molecular biology revolution which itself is an important factor in scientific progress and in transhumanism or human enhancement defined as the ideology according to which man can surpass his present state by improving his genetic material Life at High Pressure Alister Macdonald,2021-07-12 The book discusses the ways in which high hydrostatic pressure i e water pressure affects all grades of life which thrive at pressures much greater those in our normal environment The deep sea is the best known high pressure environment where pressures reach a thousand times greater than those at the surface yet it is populated by a variety of animals and microorganisms The earth s crust supports microorganisms which live in water filled pores at high pressure In addition the load bearing joints of animals like ourselves experience pulses of hydrostatic pressure of a magnitude similar to the pressure at mid ocean depths These pressures affect molecular structures and biochemical reactions Basic cellular processes are drastically affected the growth and division of cells the way nerves conduct impulses and the chemical reactions which provide energy Adaptation to high pressure also occurs in complex physiological systems such as those which provide buoyancy Probably the greatest challenge to our understanding of adaptation to high pressure is the stabilisation of the nervous system of deep sea animals to avoid convulsions which pressure causes in shallow water animals Additionally the book provides insight into the engineering required to study life at high pressure equipment which can trap

small deep sea animals and retrieve them at their high pressure equivalent equipment for microorganisms laboratory microscopes which can focus on living cells under high pressure incubators for bacteria which require high pressure to grow high pressure aquaria for marine animals and lastly and briefly manned and unmanned submersible vessels Landers and deep drill hole sampling Rather like the organisms studied many laboratory instruments have been adapted to function at high pressure
