

Understanding the ITBS Scores

- The score used for this presentation is the NPR score. What is the NPR score? NPR stands for National Percentile Rank, this means that #% of Lakeview students scored at or above the National norm group of students who took the test.
- The **Reading Total Score** comes from a combination of 2 scores/tests: 1.) Vocabulary and 2.) Reading Comprehension
- The **Math Total Score** comes from a combination of 3 scores/tests: 1.) Concepts and Estimation 2.) Problem Solving and Data 3.) Math Computation
- The data is presented in two different ways- 1.) **Program Data** –where we will focus on one particular grade level during a three year period and 2.) **Cohort data** --where we follow a group of students for 3 years to see if they are maintaining or growing.

teach the intricacies of interpreting educational data David C Berliner Dean and Regents Professor College of Education
 Arizona State University Tempe Interpreting what research data REALLY tells us Learn to effectively navigate the maze of
 competing agendas for public education from Gerald W Bracey nationally known policy analyst researcher and author of the
 periodic Bracey Report on the Condition of Education He demystifies the educational data surrounding America's public
 schools providing the guide to help educators become better more critical readers of facts figures charts and graphs In this
 handy question and answer format Bracey looks at nine tough questions and backs up answers with thoughtful explanation A
 brief historical look at America's loss of confidence in public schools is presented to show how data have been used to create
 half truths and erroneous positions In addition the most common test forms are analyzed illuminating their strengths and
 weaknesses Key issues include Interpreting educational research data Exploring and understanding tests SAT facts and
 fictions Private schools vs public schools Teacher and administrator accountability This guide is a must have for educators to
 better understand and respond to tough questions asked by parents students and the community about public school
 education in America today **Embedding Questions** National Research Council, Division of Behavioral and Social
 Sciences and Education, Board on Testing and Assessment, Committee on Embedding Common Test Items in State and
 District Assessments, 1999-11-17 Policy makers are caught between two powerful forces in relation to testing in America's
 schools One is increased interest on the part of educators reinforced by federal requirements in developing tests that
 accurately reflect local educational standards and goals The other is a strong push to gather information about the
 performance of students and schools relative to national and international standards and norms The difficulty of achieving
 these two goals simultaneously is exacerbated by both the long standing American tradition of local control of education and
 the growing public sentiment that students already take enough tests Finding a solution to this dilemma has been the focus
 of numerous debates surrounding the Voluntary National Tests proposed by President Clinton in his 1997 State of the Union
 address It was also the topic of a congressionally mandated 1998 National Research Council report Uncommon Measures
 Equivalence and Linkage Among Educational Tests and was touched upon in a U S General Accounting Office report Student
 Testing Issues Related to Voluntary National Mathematics and Reading Tests More recently Congress asked the National
 Research Council to determine the technical feasibility validity and reliability of embedding test items from the National
 Assessment of Educational Progress or other tests in state and district assessments in 4th grade reading and 8th grade
 mathematics for the purpose of developing a valid measure of student achievement within states and districts and in terms of
 national performance standards or scales This report is the response to that congressional mandate *Louisiana Register*
