Investigation of the Effective Use of Warning Lights on Indiana Department of Transportation (Indot) Vehicles and Equipment Bob McCullouch, Brandon Stevens, 2008-12-15 This study was requested by INDOT to determine if current lighting packages used on INDOT maintenance vehicles specifically snow plow vehicles can be improved with other commercially available products Different light products were obtained from various vendors mounted on INDOT vehicles and visual comparisons were performed under various lighting and weather conditions by a team of observers The comparison evaluations were performed revealing that other light packages LED models for most options were brighter and certain colors more visible The preferred light models are recommended These recommendations were forwarded to appropriate individuals that make these decisions at INDOT Implementation is dependent on purchasing decisions made at the Central Office and at each of the Districts

Emergency Vehicle Warning Lights Gerald Leonard Howett, Kenneth Low Kelly, E. Thomas Pierce, 1978 Optical Warning Devices for Authorized Emergency, Maintenance, and Service Vehicles Emergency Warning Lights and Devices Standards Committee, 2007 This document provides design guidelines test procedure references and performance requirements for omni directional and selective coverage single color optical warning devices used on authorized emergency

maintenance and service vehicles It is intended to apply to but not limited to surface land vehicles Based on the results of demonstrations conducted over the last ten years by the Emergency Warning Lights and Devices Standards Committee and the Signaling and Marking Standards Committee the following changes have been made to this document 1 Various editorial changes were made to harmonize the language with that used in other warning lights and devices standards 2 Multiple flash patterns and cyclic patterns have been added End users have increasingly been requesting non repetitive flash patterns to prevent complacency 3 Light Source definition has been added 4 Light pulse and flash definitions have been revised 5 Optical Power has been defined 6 Multiple flash patterns that are user adjustable must be rated as the lowest performance mode 7 Flash Rate was added to Section 5 Tests 8 Test Voltage In conformance with other optical warning device reports a tolerance has been added to the test voltages and requirements added for 36 volt systems 9 Environmental tests for flash rate were revised 10 Photometric performance has been changed from flash energy to meeting a specified optical power and peak intensity Advances in laboratory instrumentation have made it practical and cost effective to directly measure the optical power generated by any optical warning device The direct measurement of peak intensity also is readily done with current technology 11 The redefinition of the white boundary toward blue was added in anticipation of a change to the SAE J578 specification to harmonize color boundaries with the ECE standard 12 New markings for selective coverage devices were added to provide a marking distinction between omnidirectional devices and devices with selective coverage **Vehicle**
