Veneeta Dayal, 2016-11-03 This book synthesizes and integrates 40 years of research on the semantics of questions and its interface with pragmatics and syntax conducted within the formal semantics tradition A wide range of topics are covered including weak strong exhaustiveness maximality functional answers single multiple trapped list answers embedding predicates quantificational variability concealed questions weak islands polar and alternative questions negative polarity and non canonical questions The literature on this rich set of topics theoretically diverse and scattered across multiple venues is often hard to assimilate Veneeta Dayal drawing on her own research brings them together for the first time in a coherent concise and well structured whole Each chapter begins with a non technical introduction to the issues discussed semantically sophisticated accounts are then presented incrementally with the major points summarized at the end of each section Written in an accessible style this book provides both a guide to one of the most vibrant areas of research in natural language and an account of how this area of study is developing It will be a unique resource for the novice and expert alike and seeks to appeal to a variety of readers without compromising depth and breadth of coverage

**Linguistics of Vietnamese** Daniel Hole, Elisabeth Löbel, 2013-05-28 The present collection of articles grew out of a workshop on Vietnamese linguistics in 2009 at the University of Stuttgart Germany To our knowledge no workshop with a comparable scope has been held outside of Vietnam for the past 20 years or even longer Given the important typological status of Vietnamese as a paradigm case of an isolating language the volume covers the most relevant fields in linguistics syntax semantics phonology and the lexicon A guiding principle in assembling the chapters for this volume has been to take an inclusive stance as far as the commitment to different frameworks and research methodologies is concerned All the contributors are proponents of recent developments in their individual areas of specialization The editors have taken special care to cater for a readership which should be as broad as possible This means that each contribution is self contained and does not presuppose any knowledge of Vietnamese The volume is recommended to general linguists comparative linguists typologists and to researchers specializing in languages of East and South East Asia
