resources it can spend to remain sustainable Risk based methods play a pivotal role in identifying and ranking alternative sustainable choices while accounting for uncertainty and variability Specifically most reductions in risks require a balancing of the costs and benefits associated with the action to reduce exposure to a hazard and thus risk This balancing necessarily involves linking exposure and response through causation This essential aspect of risk assessment and management if done incorrectly can be costly to society

Management and Control of Foreign Exchange Risk Laurent L. Jacque,2013-12-01 Since I first published *Management of Foreign Exchange Risk* Lexington Books 1978 financial innovation

spurred in part by exploding volatility in currency prices has revolutionized the theory and praxis of foreign exchange risk management Old fashioned forward contracts have surrendered market share to currency swaps and options as well as to their perpetually multiplying derivatives Interestingly forex derivatives now provide a low cost and highly efficient method of transferring risk from the firms that are exposed to risk but which would rather not be i e risk hedgers to those which are not exposed but which in exchange for a fee would assume some exposure to risk i e risk bearers Perhaps more importantly foreign exchange risk management which was once a fairly mechanical task confined to the international treasury function is now permeating global strategic management Indeed since the demise of the Bretton Woods system of pegged exchange rates the cost of forex hedging instruments has fallen so dramatically that firms can readily avail themselves of hedging products which can reduce unwanted risk thereby potentially gaining a competitive advantage over rivals that do not Management and Control of Foreign Exchange Risk has grown out of a fundamental revision of my earlier work published almost 20 years ago In the process my thinking about risk and its mathematics has greatly benefitted from my association with John Cozzolino and Charles Tapiero
