humanitarian law or any other sub regime of international law The two countries are in a different position when facing the implementation of this maze of obligations South Africa is a developing economy that faces various capacity challenges which at times also impact the manner and extent to which it implements its international treaty obligations Germany on the other hand benefits from comparatively well funded institutes of international law and a well trained academic community which have contributed to the successful implementation of much of international law But as the relevant chapters in this volume show the German case is not without its own complexities As a result an exchange of ideas and experiences pertaining to the implementation of international obligations can prove fruitful for both countries Moreover such an exchange could also serve as a useful point of departure for other countries in Southern Africa that face similar challenges in relation to implementation The current book explores suitable techniques of implementation of international law by comparing South Africa with Germany After a general overview of the status of international law within Germany and South Africa respectively it focuses on the implementation of international instruments pertaining to key sub areas of international law in the two countries These include the United Nations Charter peace and security the international law of the sea international economic law international environmental law international human rights law international criminal law regional integration and the status of international judicial decisions before domestic courts The Truth about Crime Jean Comaroff, John L. Comaroff, 2016-12-05

This new book by the well known anthropologists Jean and John L Comaroff explores the global preoccupation with criminality in the early twenty first century a preoccupation strikingly disproportionate in most places and for most people to the risks posed by lawlessness to the conduct of everyday life Ours in an epoch in which law making law breaking and law enforcement are ever more critical registers in which societies construct contest and confront truths about themselves an epoch in which criminology broadly defined has displaced sociology as the privileged means by which the social world knows itself They also argue that as the result of a tectonic shift in the triangulation of capital the state and governance the meanings attached to crime and with it the nature of policing have undergone significant change also that there has been a palpable muddying of the lines between legality and illegality between corruption and conventional business even between crime and policing which exist nowadays in ever greater hyphenated complicity Thinking through Crime and Policing is therefore an excursion into the contemporary Order of Things or rather into the metaphysic of disorder that saturates the late modern world indeed has become its leitmotif It is also a meditation on sovereignty and citizenship on civility class and race on the law and its transgression on the political economy of representation **Trans-jurisdictional**

*Corrupted* Jonathan D Jansen, 2023-02 Through investigatory reports and interviews Jonathan Jansen reveals the structural conditions for chronic dysfunction in a sample of South African universities He reveals the political economy at work and the intense competition for resources on campuses He also provides interventions for these fragile institutions Why do some universities seem to be in a constant state of turmoil and dysfunction Jonathan Jansen explores the root causes of chronic instability in a

sample of South African universities Through scrutiny of investigatory reports and interviews with more than 100 university managers and government officials Jansen finds that at the heart of the dysfunction in universities is an intense and sometimes deadly competition for resources especially on campuses located in impoverished communities It is not the lack of institutional resources but their concentration in a university that draws a mix of corrupt actors from local politicians and taxi operators to members of council and management into a never ending run on the material such as money for infrastructure and symbolic namely graduation certificates for sale assets of these institutions Jansen argues that the problem won t be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Jansen makes an important intervention to understanding the root causes and offers interventions to produce stabilities such as the depoliticisation of university councils and appointing academics of integrity and capacity in the management and leadership of these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly
